CROP-GROWING SKYSCRAPERS

Topic: Agriculture • Environment • Technology • Urban Planning

PART 1. VOCABULARY

STT	Vocabulary	POS	IPA	Meaning	Synonyms
1	demographic	adj/n	/ˌdeməˈgræfɪk/	thuộc nhân khẩu học / số liệu nhân khẩu	population-related
2	hothouse	n	/ˈhəʊθaʊs/	nhà kính (trồng cây)	greenhouse
3	in vogue	idiom	/ɪn vəʊg/	hợp thời trang, đang thịnh hành	fashionable, popular, trendy
4	accommodate	v	/əˈkɒmədeɪt/	cung cấp nơi ở, đáp ứng nhu cầu	lodge, house, provide for
5	multi-storey	adj	/ˌmʌltiˈstɔːri/	nhiều tầng (tòa nhà)	multi-level, high-rise
6	drastically	adv	/ˈdræstɪkli/	một cách mạnh mẽ, trầm trọng	severely, radically, significantly
7	proponent	n	/prəˈpəʊnənt/	người ủng hộ, đề xuất	advocate, supporter, champion
8	sustainable	adj	/səˈsteɪnəbl/	bền vững	eco-friendly, renewable, viable
9	sacrificed	adj/v	/ˈsækrɪfaɪst/	bị hy sinh, bị đánh đổi	surrendered, given up, compromised
10	despoil	v	/dɪˈspɔɪl/	tàn phá, cướp phá	ruin, plunder, devastate
11	verdant	adj	/ˈvɜːdnt/	xanh tươi, phủ đầy cây cỏ	lush, green, flourishing
12	semi-arid	adj	/ˌsemiˈæɪrɪd/	bán khô hạn	dry, parched
13	rigour	n	/ˈrɪɡə(r)/	sự khắc nghiệt, sự khắc khổ	hardship, severity, harshness
14	organic	adj	/ɔːˈɡæɪnɪk/	hữu cơ (không dùng hóa chất)	natural, chemical-free

15	herbicide	n	/ˈhɜːbɪsaɪd/	thuốc trừ cỏ	weedkiller
16	pesticide	n	/ˈpestɪsaɪd/	thuốc trừ sâu	insecticide, pest control agent
17	fertiliser	n	/ˈfɜːtəlaɪzə(r)/	phân bón	plant food, compost
18	incidence	n	/ˈɪnsɪdəns/	tỷ lệ mắc phải, tần suất xảy ra	occurrence, rate, frequency
19	infectious	adj	/ɪnˈfekʃəs/	lây nhiễm, truyền nhiễm	contagious, transmissible
20	nonedible	adj	/ˌnɒn ˈedəbl/	không ăn được	inedible, unfit to eat
21	drawback	n	/ˈdrɔːbæk/	nhược điểm, hạn chế	disadvantage, downside, flaw
22	prohibitively	adv	/prəˈhɪbətɪvli/	(giá) quá đắt đỏ, không thể chi trả	excessively, exorbitantly
23	aspiration	n	/ˌæspəˈreɪʃn/	nguyện vọng, khát vọng	desire, ambition, goal
24	stacked	adj	/stækt/	được xếp chồng lên nhau	piled, arranged in layers
25	detrimental	adj	/ˌdetrɪˈmentl/	có hại, gây bất lợi	harmful, damaging, adverse

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	demographic trend	xu hướng nhân khẩu học
2	conservative estimate	ước tính khiêm tốn / thận trọng
3	traditional farming method	phương pháp canh tác truyền thống
4	cutting-edge technology	công nghệ tiên tiến / hiện đại nhất
5	environmentally controlled condition	điều kiện được kiểm soát môi trường
6	urban renewal	sự đổi mới / tái thiết đô thị
7	horizontal farming	canh tác theo chiều ngang
8	weather-related crop failure	sự thất thu mùa màng do thời tiết

9	fossil fuel use	việc sử dụng nhiên liệu hóa thạch
10	artificial light	ánh sáng nhân tạo
11	multi-storey facility	cơ sở / tòa nhà nhiều tầng
12	renewable energy	năng lượng tái tạo
13	single-storey greenhouse	nhà kính một tầng
14	detrimental impact	ảnh hưởng / tác động có hại
15	urban rooftop	mái nhà ở khu vực đô thị

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: High electricity costs make running large artificial lighting systems _____ expensive for many growers.

A. drastically B. prohibitively C. sustainably D. organically

Question 2: The widespread construction of multi-storey facilities is expected to _____ future urban populations.

A. despoil B. sacrifice C. accommodate D. stack

Question 3: Excessive reliance on chemical fertilizers can have a _____ impact on natural soil ecosystems.

A. verdant B. detrimental C. sustainable D. nonedible

Question 4: Early advocates claimed that vertical farms could serve as leading _____ of sustainable agricultural progress.

A. drawbacks B. proponents C. rigours D. incidences

Question 5: Without protective structures, crops are completely exposed to the harsh _____ of extreme weather.

A. rigours B. aspirations C. drawbacks D. proportions

Exercise 2: Choose the correct collocation.

Question 6: Switching from traditional agriculture to indoor facilities significantly reduces overall _____.

A. single-storey greenhouse B. urban rooftop
C. demographic trend D. fossil fuel use

Question 7: Installing solar panels on a _____ provides direct access to natural overhead sunlight.

A. fossil fuel use B. demographic trend
C. single-storey greenhouse D. detrimental impact

Question 8: Indoor vertical cultivation relies heavily on _____ to supplement natural sunlight in lower levels.

A. traditional farming method B. horizontal farming
C. artificial light D. urban renewal

Question 9: Plants grown in an _____ are protected from unexpected

temperature drops and seasonal storms.

- A. environmentally controlled condition B. urban rooftop
C. horizontal farming D. fossil fuel use

Question 10: According to a _____, global food demand will double as city populations expand.

- A. single-storey greenhouse B. conservative estimate
C. detrimental impact D. fossil fuel use

Exercise 3: Complete the sentences.

Question 11: The idea of using hydro-farms in metropolitan centers is currently very much _____ among city developers.

- A. nonedible B. in vogue C. semi-arid D. stacked

Question 12: Severe environmental degradation can quickly convert once _____ fields into barren wasteland.

- A. detrimental B. nonedible C. stacked D. verdant

Question 13: One major _____ of building high-rise farms is the huge initial capital required for equipment.

- A. drawback B. proponent C. incidence D. aspiration

Question 14: Practicing controlled indoor agriculture eliminates the need for chemical _____ to destroy unwanted weeds.

- A. drawbacks B. aspirations C. herbicides D. hothouses

Question 15: Utilizing plant waste for biogas generation provides clean energy and supports urban _____ efforts.

- A. urban renewal B. conservative estimate
C. fossil fuel use D. traditional farming method

Exercise 4: Choose the best answer.

Question 16: The word **proponent** is closest in meaning to:

- A. opponent B. competitor C. critic D. advocate

Question 17: The word **drawback** is closest in meaning to:

- A. advantage B. disadvantage C. benefit D. strength

Question 18: The word **detrimental** is closest in meaning to:

- A. harmful B. beneficial C. useful D. effective

Question 19: The word **despoil** is closest in meaning to:

- A. protect B. construct C. enrich D. ruin

Question 20: The word **accommodate** is closest in meaning to:

- A. exclude B. provide for C. reject D. ignore

THE FALKIRK WHEEL

Topic: Engineering • Infrastructure • History • Transportation

PART 1. VOCABULARY

STT	Vocabulary	POS	IPA	Meaning	Synonyms
1	navigability	n	/ˌnævɪgəˈbɪləti/	tình trạng tàu thuyền có thể đi lại được	passability
2	lock	n	/lɒk/	âu thuyền (đoạn kênh điều chỉnh mực nước)	waterway gate, canal basin
3	dismantle	v	/dɪsˈmæntl/	tháo dỡ (máy móc, công trình)	take apart, disassemble, deconstruct
4	landmark	n	/ˈlændmɑːk/	công trình/địa điểm biểu tượng	monument, milestone, feature
5	commemoration	n	/kəˌmeməˈreɪʃn/	sự tưởng niệm, sự kỷ niệm	memorial, honor, tribute
6	regeneration	n	/riːˌdʒenəˈreɪʃn/	sự tái thiết, phục hồi	renewal, restoration, revival
7	seesaw	n	/ˈsiːsɔː/	trò bập bênh	teeter-totter
8	monorail	n	/ˈmɒnəʊreɪl/	đường sắt đơn	single-track railway
9	propeller	n	/prəˈpelə(r)/	chân vịt (tàu thuyền, máy bay)	rotor, drive mechanism
10	painstakingly	adv	/ˈpeɪnzteɪkɪŋli/	một cách tỉ mỉ, cẩn thận, công phu	meticulously, carefully, thoroughly
11	withstand	v	/wɪðˈstænd/	chịu đựng, chống chịu	resist, endure, bear
12	robust	adj	/rəʊˈbʌst/	vững chắc, bền bỉ	sturdy, strong, durable
13	diametrically	adv	/ˌdaɪəˈmetrɪkli/	hoàn toàn, ở hai cực đối lập	completely, directly, entirely

14	gondola	n	/'gɒndələ/	buồng treo / thuyền cabin (ở đây là buồng chứa nc)	water cabin, enclosure
15	displacement	n	/dɪs'pleɪsmənt/	sự thể tích nước bị chiếm chỗ / sự dịch chuyển	shifting, movement, substitution
16	domestic	adj	/də'mestɪk/	thuộc gia đình, trong nhà, nội địa	household, home, internal
17	hydraulic	adj	/haɪ'drɒ:lɪk/	thuộc thủy lực (dùng áp lực nước/chất lỏng)	fluid-operated, water-powered
18	array	n	/ə'reɪ/	dãy, chuỗi, hàng ngũ (máy móc/thiết bị)	collection, arrangement, display
19	axle	n	/'æksl/	trục xe, trục quay	shaft, spindle, rod
20	cog	n	/kɒg/	bánh răng	gear, tooth, sprocket
21	aqueduct	n	/'ækwɪdʌkt/	cầu dẫn nước	water bridge, conduit, channel
22	elevate	v	/'elɪveɪt/	nâng lên, đưa lên cao	raise, lift, hoist
23	historic	adj	/hɪ'stɒrɪk/	có tính lịch sử, quan trọng trong lịch sử	famous, significant, momentous
24	distinct	adj	/dɪ'stɪŋkt/	riêng biệt, rõ rệt	clear, definite, separate
25	sequence	n	/'si:kwəns/	chuỗi, tiến trình nối tiếp nhau	series, succession, chain

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	rotating boat lift	thang nâng thuyền xoay
2	economic regeneration	sự tái thiết / phát triển kinh tế
3	Celtic double-headed axe	riều hai đầu kiểu Xen-tơ (Celtic)
4	toy building set	bộ đồ chơi lắp ráp
5	withstand immense stress	chịu đựng áp lực / ứng lực cực lớn
6	opposing axe-shaped arms	các cánh tay hình riều đối diện nhau

7	central spine	trục sống lưng trung tâm
8	principle of displacement	nguyên lý Archimedes về sự chiếm chỗ của chất lỏng
9	hydraulic steel gate	cổng thép thủy lực
10	central machine room	phòng máy trung tâm
11	hydraulic motor	động cơ thủy lực
12	central axle	trục quay trung tâm
13	gearing system	hệ thống bánh răng
14	fixed inner cog	bánh răng cố định bên trong

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: The giant rotating structure was designed to _____ the massive weight of boats without collapsing.

- A. dismantle B. elevate C. withstand D. displace

Question 2: Workers spent months _____ fitting together thousands of steel pieces with extreme accuracy.

- A. diametrically B. painstakingly C. historically D. domestic

Question 3: The whole steel framework was constructed to be exceptionally _____ so it could rotate smoothly for decades.

- A. distinct B. robust C. hydraulic D. domestic

Question 4: Once the water was pumped out of the basin, the large _____ gates sealed the section off completely.

- A. hydraulic B. historic C. domestic D. array

Question 5: The construction of the new landmark sparked massive _____ across the entire surrounding region.

- A. displacement B. seesaw C. monorail D. economic regeneration

Exercise 2: Choose the correct collocation.

Question 6: The Falkirk Wheel is famous worldwide for being the only operational _____ in existence.

- A. fixed inner cog B. rotating boat lift
C. central machine room D. toy building set

Question 7: According to the _____, a floating vessel pushes away water equal to its own weight.

- A. central axle B. gearing system
C. principle of displacement D. hydraulic motor

Question 8: Technicians operate all movement and control functions directly from the underground _____.

- A. fixed inner cog B. opposing axe-shaped arms
C. central machine room D. principle of displacement

Question 9: A complex _____ was incorporated to guarantee that the water basins stay completely level during rotation.

A. gearing system B. central spine C. hydraulic steel gate D. fixed inner cog

Question 10: The two huge water-filled chambers are mounted at the ends of two _____.

A. fixed inner cogs B. opposing axe-shaped arms
C. hydraulic motors D. toy building sets

Exercise 3: Complete the sentences.

Question 11: Before transportation, engineers had to _____ the whole structure into smaller manageable pieces.

A. displace B. elevate C. withstand D. dismantle

Question 12: Water flows across the valleys through a massive elevated structure known as an _____.

A. aqueduct B. axle C. cog D. monorail

Question 13: The central drive shaft turns smoothly because power is evenly transferred through the main _____.

A. central axle B. landmark C. displacement D. seesaw

Question 14: Two large water-filled containers, known as _____s, carry boats safely up and down between canal levels.

A. propeller B. landmark C. gondola D. sequence

Question 15: Due to constraints imposed by the ancient Roman ruins, the wheel could not _____ boats over the full 35-meter gap.

A. elevate B. dismantle C. withstand D. displace

Exercise 4: Choose the best answer.

Question 16: The word **dismantle** is closest in meaning to:

A. build B. take apart C. repair D. connect

Question 17: The word **painstakingly** is closest in meaning to:

A. carelessly B. meticulously C. rapidly D. roughly

Question 18: The word **robust** is closest in meaning to:

A. fragile B. temporary C. weak D. sturdy

Question 19: The word **elevate** is closest in meaning to:

A. lower B. lift C. drop D. stop

Question 20: The word **withstand** is closest in meaning to:

A. resist B. surrender C. yield D. break

REDUCING THE EFFECTS OF CLIMATE CHANGE

Topic: Climate Change • Environmental Science • Technology

PART 1. VOCABULARY

STT	Vocabulary	POS	IPA	Meaning	Synonyms
1	inevitable	adj	/ɪnˈevɪtəbl/	không thể tránh khỏi	unavoidable, certain, inexorable
2	stem	v	/stem/	ngăn chặn, kiềm chế	stop, halt, check, restrain
3	manipulation	n	/məˌnɪpjʊˈleɪʃn/	sự kiểm soát, sự can thiệp/tác động	control, alteration, handling
4	equivalent	n/adj	/ɪˈkwɪvələnt/	sự tương đương / tương đương	equal, counterpart, parallel
5	disperse	v	/dɪˈspɜːs/	giải tán, phân tán, xua tan	scatter, dissipate, spread
6	refract	v	/rɪˈfrækt/	khúc xạ (ánh sáng)	deflect, bend
7	stimulate	v	/ˈstɪmjuleɪt/	kích thích, thúc đẩy	encourage, prompt, foster
8	replenish	v	/rɪˈplenɪʃ/	làm đầy lại, bổ sung	refill, restore, renew
9	aerosol	n	/ˈeəərəsɒl/	bình xịt / hạt khí dung (bụi lỏng/rắn trong không khí)	spray, dispersion, droplet
10	stratosphere	n	/ˈstrætəsfiə(r)/	tầng bình lưu	upper atmosphere
11	dimming	n	/ˈdɪmɪŋ/	sự làm mờ, sự suy giảm ánh sáng	darkening, obscuring
12	scrutinise	v	/ˈskruːtənaɪz/	xem xét, nghiên cứu kỹ lưỡng	examine, inspect, investigate
13	reinforce	v	/ˈriːɪnˈfɔːs/	củng cố, gia cố, tăng cường	strengthen, bolster, fortify
14	shed	v	/ʃed/	rụng (lá, lông), trút bỏ	drop, cast off, discard

15	substitute	n/v	/ˈsʌbstɪtju:t/	sự thay thế / thay thế	replacement, alternative
16	guarded	adj	/ˈɡɑːdɪd/	thận trọng, giữ kẽ	cautious, careful, reserved

24	stride	n	/straɪd/	bước tiến, sự tiến bộ	progress, step, advance
25	thoroughly	adv	/ˈθʌrəli/	một cách triệt để, kỹ lưỡng	completely, carefully, rigorously

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	fossil fuel	nhiên liệu hóa thạch
2	global warming	sự nóng lên toàn cầu
3	carbon emission	lượng khí thải cacbon
4	make major strides	có những bước tiến lớn
5	large-scale manipulation	sự can thiệp / tác động trên quy mô lớn
6	backup generator	máy phát điện dự phòng

7	eye-catching idea	ý tưởng thu hút, gây chú ý
8	sunlight-refracting sunshade	tấm chắn nắng khúc xạ ánh sáng mặt trời
9	high latitude	vĩ độ cao (kề khu vực cực)
10	volcanic explosion	vụ nổ / phun trào núi lửa
11	short-term cooling	sự hạ nhiệt ngắn hạn
12	high-tension cable	cáp chịu lực / chịu kéo cao
13	permanent solution	giải pháp lâu dài / vĩnh viễn
14	rainfall pattern	quy luật / mô hình lượng mưa
15	pre-industrial level	mức độ trước thời kỳ công nghiệp

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Many climate scientists consider the gradual temperature increase across the globe to be completely _____.

- A. guarded B. intentional C. equivalent D. inevitable

Question 2: Releasing particles into the upper atmosphere could help reduce global temperature by _____ incoming sunlight.

- A. refracting B. stimulating C. excluding D. overshooting

Question 3: Experts agree that geo-engineering must be viewed as an emergency backup rather than a permanent _____ for emissions reduction.

- A. scenario B. aerosol C. substitute D. stride

Question 4: Researchers need to _____ all potential environmental impacts before implementing large-scale schemes.

- A. disperse B. scrutinise C. induce D. shed

Question 5: Deploying chemical aerosols in the atmosphere might cause unpredictable changes in regional _____ levels.

- A. stratosphere B. latitude C. manipulation D. precipitation

Exercise 2: Choose the correct collocation.

Question 6: Cutting down our dependency on coal and oil requires drastically reducing global _____.

- A. carbon emission B. backup generator C. high latitude D. volcanic explosion

Question 7: Installing a giant space mirror is widely considered the most _____ proposed by climate researchers.

- A. short-term cooling B. rainfall pattern
C. eye-catching idea D. high-tension cable

Question 8: Historical data shows that a major _____ can naturally inject thousands of tons of sulphur into the air.

- A. permanent solution B. volcanic explosion
C. pre-industrial level D. backup generator

Question 9: Re-freezing polar ice caps is essential to maintaining low temperatures in regions located at a _____.

- A. high-tension cable B. rainfall pattern C. carbon emission D. high latitude

Question 10: Atmospheric intervention could inadvertently alter the regional _____ and disrupt agricultural cycles.

- A. rainfall pattern B. backup generator C. short-term cooling D. permanent solution

Exercise 3: Complete the sentences.

Question 11: During winter, deciduous trees like birches _____ their leaves, allowing solar radiation to reflect off snow cover.

- A. exclude B. shed C. induce D. replenish

Question 12: Several countries have managed to _____ in developing green technologies over the past decade.

- A. fossil fuel B. global warming C. pre-industrial level D. make major strides

Question 13: If cooling interventions are applied too aggressively, global temperatures might unintentionally _____ target limits.

- A. refract B. stem C. overshoot D. disperse

Question 14: Human activities have _____ unprecedented changes in atmospheric composition over the last century.

- A. induced B. scrutinised C. excluded D. dimming

Question 15: Scientists remain cautious because stopping geo-engineering abruptly could create a dangerous warming _____.

- A. aerosol B. stratosphere C. manipulation D. scenario

Exercise 4: Choose the best answer.

Question 16: The word **inevitable** is closest in meaning to:

- A. uncertain B. unavoidable C. avoidable D. temporary

Question 17: The word **scrutinise** is closest in meaning to:

- A. ignore B. reject C. examine D. create

Question 18: The word **substitute** is closest in meaning to:

- A. replacement B. problem C. cause D. result

Question 19: The word **guarded** is closest in meaning to:

- A. excited B. cautious C. reckless D. open

Question 20: The word **induce** is closest in meaning to:

- A. prevent B. stop C. cause D. diminish

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: The archaeologists were amazed to find that half of the ship's wooden structure had managed to remain _____ under the clay layer.

A. feasible B. intact C. undisciplined D. precise

Question 2: After sitting on the seabed for over a century, the historic warship gradually faded into _____.

A. collaboration B. obstruction C. obscurity D. degradation

Question 3: Experts spent years collecting data to determine whether it was technically _____ to raise the heavy timber hull.

A. feasible B. precise C. hydraulic D. intact

Question 4: The divers used powerful _____ jacks to overcome the immense suction force holding the vessel in the mud.

A. precise B. undisciplined C. hydraulic D. feasible

Question 5: Divers spotted a large piece of wooden timber that began to _____ slightly out of the seabed sand.

A. initiate B. salvage C. erode D. protrude

Exercise 2: Choose the correct collocation.

Question 6: The salvage team relied heavily on modern _____ to scan the seabed and pinpoint the location of the lost wreck.

A. side-scan sonar B. sea battle C. hydraulic jack D. survey drawing

Question 7: Before lifting the delicate hull out of the water, engineers custom-built a specially padded _____.

A. fighting career B. lifting cradle C. sea battle D. side-scan sonar

Question 8: The discovery of thousands of perfectly preserved artifacts transformed the wreck into a true _____.

A. hydraulic jack B. survey drawing C. treasure trove D. sea battle

Question 9: Authorities refused to _____ for the final retrieval operation until every risk factor was analyzed.

A. remain intact B. fade into obscurity
C. give the go-ahead D. side-scan sonar

Question 10: The complex _____ required precise coordination among divers, engineers, and maritime historians.

A. survey drawing B. salvage operation
C. fighting career D. hydraulic jack

Exercise 3: Complete the sentences.

Question 11: Marine biologists warned that exposed sections of the hull would quickly _____ due to salt water and organisms.

A. initiate B. erode C. protrude D. cushion

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Human activities such as urban development are having a severe and _____ impact on natural animal migration routes.

A. linear B. intricate C. detrimental D. undeterred

Question 2: On its long journey, the arctic tern flies onward with _____ intent, ignoring food temptations along the way.

A. intricate B. undivided C. terrestrial D. prolonged

Question 3: Biological migration usually involves a _____ movement that carries creatures far outside their familiar natural habitats.

A. prolonged B. voracious C. detrimental D. private

Question 4: When food supplies on a single host plant become fully _____, aphid offspring will fly onward to search for fresh leaves.

A. traversed B. allocated C. depleted D. overwintered

Question 5: Protecting migratory animals across vast distances requires international cooperation and political _____ across borders.

A. allocation B. bottleneck C. temptation D. resoluteness

Exercise 2: Choose the correct collocation.

Question 6: Biologist Hugh Dingle noted that migrating animals remain entirely _____ by distractions that would normally stop other species.

A. undeterred B. depleted C. traversed D. overwintered

Question 7: Establishments of a protected _____ can help American pronghorns move safely between their seasonal grazing grounds.

A. terrestrial mammal B. migration corridor C. regular interval D. linear path

Question 8: The American pronghorn is a remarkable _____ that relies heavily on its speed and long-distance vision to escape predators.

A. migration corridor B. private land C. regular interval D. terrestrial mammal

Question 9: Unlike local gulls that dive _____ for scraps thrown from boats, migrating terns stay focused strictly on their journey.

- A. detrimentally B. intricately C. voraciously D. linearly

Question 10: Migrating species exhibit an _____ that keeps them driving toward their final destination despite severe exhaustion.

- A. regular interval B. intense attentiveness C. private land D. linear path

Exercise 3: Complete the sentences

Question 11: The arctic tern flies tens of thousands of kilometers annually driven by an _____ that pushes it toward its breeding grounds.

- A. inherited instinct B. private land C. regular interval D. linear path

Question 12: Severe geographical bottlenecks create dangerous _____ along the traditional travel routes of wild herds.

- A. constriction B. allocation C. temptation D. interval

Question 13: To survive harsh freezing temperatures, pronghorns move down to open plains where they can _____ during winter.

- A. traverse B. convergence C. deplete D. overwinter

Question 14: Herds of pronghorns must _____ high, open ridges where they can easily spot potential predators from a distance.

- A. deplete B. traverse C. overwinter D. converge

Question 15: Dingle's definition of migration is more _____ than Berger's because it accounts for specific behavioral patterns across species.

- A. detrimental B. intricate C. prolonged D. terrestrial

Exercise 4: Choose the best answer.

Question 16: The word **detrimental** is closest in meaning to:

- A. helpful B. essential C. harmful D. temporary

Question 17: The word **deplete** is closest in meaning to:

- A. exhaust B. increase C. protect D. create

Question 18: The word **traverse** is closest in meaning to:

- A. avoid B. cross C. build D. destroy

Question 19: The word **intricate** is closest in meaning to:

- A. simple B. useless C. modern D. complex

Question 20: The word **undeterred** is closest in meaning to:

- A. discouraged B. persistent C. delayed D. frightened

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: The author aims to reveal the underlying logical reasoning rather than focusing solely on basic _____ calculations.

- A. intuitive B. arithmetic C. subatomic D. sustained

Question 2: Non-mathematical readers can gain deep insights by following a careful _____ analysis throughout each chapter.

- A. step-by-step B. unanticipated C. alleged D. notorious

Question 3: Studying geometric theorems helps train the mind to develop strong _____ skills required in legal professions.

- A. intuitive B. elementary C. tantalized D. analytical

Question 4: Many popular science books are forced to _____ complex mathematical proofs to make the content accessible to laymen.

- A. attribute B. master C. omit D. reveal

Question 5: Without working through the underlying equations, the reader remains merely a _____ rather than an active participant.

- A. spectator B. foundation C. aficionado D. phenomenon

Exercise 2: Choose the correct collocation.

Question 6: Pure research often leads to surprising _____ that solve real-world engineering challenges years later.

- A. unanticipated applications B. general public C. human potential D. political science

Question 7: Solving complex algebraic problems requires a level of _____ that benefits students in medical school.

- A. structural engineer B. physical universe C. precise analysis D. common sense

Question 8: Most introductory chapters rely on little more than basic logic and

_____ to explain advanced concepts.

A. precise analysis B. common sense C. physical universe D. structural engineer

Question 9: The book seeks to bridge the gap between humanistic culture and the rigorous study of the _____.

A. physical universe B. general public C. political science D. structural engineer

Question 10: Many career fields outside of STEM, including law and medicine, demand exceptionally sharp _____.

A. general public B. analytical skills C. physical universe D. political science

Exercise 3: Complete the sentences

Question 11: Successful legal professionals often _____ their ability to unpack complex contracts to their early training in mathematics.

A. master B. omit C. reveal D. attribute

Question 12: Readers are encouraged to slow down and maintain _____ concentration when following difficult arguments.

A. notorious B. subatomic C. sustained D. elementary

Question 13: Even math _____ who already love the subject will discover fresh insights and unique problem-solving techniques in this text.

A. aficionados B. spectations C. disciplines D. foundations

Question 14: Contrary to popular belief, creative _____ plays just as vital a role in mathematical breakthroughs as rigorous computation.

A. intuition B. arithmetic C. trigonometry D. discipline

Question 15: Once students gain confidence, they can easily _____ intricate logical principles that once seemed intimidating.

A. master B. omit C. attribute D. tantalize

Exercise 4: Choose the best answer.

Question 16: The word **unanticipated** is closest in meaning to:

A. expected B. unforeseen C. planned D. useless

Question 17: The word **adept** is closest in meaning to:

A. hesitant B. clumsy C. skillful D. inexperienced

Question 18: The word **omit** is closest in meaning to:

A. include B. exclude C. emphasize D. explain

Question 19: The word **sustained** is closest in meaning to:

A. weak B. brief C. interrupted D. continuous

Question 20: The word **notorious** is closest in meaning to:

A. famous for sth bad B. unknown to most C. universally admired D. completely hidden

11	severe stress	sự căng thẳng nghiêm trọng
12	genetic mechanism	cơ chế di truyền

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: The constant _____ between genes and the environment influences many human characteristics.

- A. interplay B. mechanism C. schizophrenia D. surge

Question 2: Scientists use twin studies to _____ the influence of genetics on intelligence and personality.

- A. rear B. quantify C. coin D. untangle

Question 3: Identical twins have almost the same _____ because they originate from the same fertilized egg.

- A. genetic makeup B. behavioral problem
C. radical conclusion D. severe stress

Question 4: The researcher became a _____ in the field of behavioral genetics after decades of groundbreaking work.

- A. ailment B. mechanism C. trailblazer D. surge

Question 5: Epigenetic changes may alter gene expression without changing the underlying _____.

- A. environmental factor B. genetic code
C. fraternal twin D. precious opportunity

Exercise 2: Choose the correct collocation.

Question 6: A severe _____ during pregnancy may affect the development of the unborn child.

- A. genetic code B. severe stress C. fraternal twin D. radical conclusion

Question 7: Researchers examined pairs of _____ to compare genetic and environmental influences.

- A. identical twins B. embryonic cells
C. behavioral problems D. environmental factors

Question 8: The phrase _____ describes the combined influence of genes and upbringing.

- A. genetic mechanism B. nature and nurture
C. precious opportunity D. radical conclusion

Question 9: Exposure to pollution is considered an important ____ in many diseases.

- A. identical twin B. genetic code C. embryonic cell D. environmental factor

Question 10: Scientists are still trying to understand the complex _____ behind inherited disorders.

- A. behavioral problem B. fraternal twin
C. genetic mechanism D. precious opportunity

Exercise 3: Complete the sentences

Question 11: The study attempted to _____ the causes of differences between twins raised in separate families.

- A. pinpoint B. coin C. rear D. untangle

Question 12: Francis Galton was the first scientist to _____ the famous expression “nature and nurture.”

- A. quantify B. coin C. rear D. untangle

Question 13: Children with a genetic _____ to certain illnesses may become sick more easily.

- A. mechanism B. trailblazer C. surge D. vulnerability

Question 14: Laboratory mice are commonly _____ in controlled environments for genetic experiments.

- A. reared B. pinpointed C. quantified D. coined

Question 15: Researchers hope to _____ the exact genes responsible for schizophrenia.

- A. rear B. quantify C. pinpoint D. coin

Exercise 4: Choose the best answer.

Question 16: The word **identical** is closest in meaning to:

- A. similar B. exact C. different D. related

Question 17: The word **vulnerability** is closest in meaning to:

- A. protection B. weakness C. strength D. recovery

Question 18: The word **hardwired** is closest in meaning to:

- A. learned B. temporary C. innate D. flexible

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: The soundtrack adds a subtle _____ to the emotional scene without distracting the audience.

- A. nuance B. speed C. convention D. menace

Question 2: Dialogue in fast-paced comedies is often delivered at _____.

- A. emotional nuance B. breakneck speed
C. visual experience D. soundtrack

Question 3: Directors frequently use music to _____ future events in a story.

- A. merge B. underestimate C. foreshadow D. escape

Question 4: A harsh musical chord can create an _____ atmosphere before the danger appears on screen.

- A. subtle B. intrinsic C. ominous D. banal

Question 5: Background music has become so _____ in modern films that many viewers hardly notice it.

- A. ubiquitous B. dissonant C. asynchronous D. frenetic

Exercise 2: Choose the correct collocation.

Question 6: Music, dialogue, and effects together form a film's complete _____.

- A. art form B. breakneck speed C. emotional nuance D. soundtrack

Question 7: A thunderclap in a horror film is a classic sound _____.

- A. ingredient B. theme C. convention D. effect

Question 8: Many action films provide viewers with a sense of _____.

- A. visual experience B. pure escapism
C. emotional nuance D. subconscious mind

Question 9: Repeated musical patterns can influence the audience's _____ without their awareness.

- A. soundtrack B. art form C. subconscious mind D. breakneck speed

Question 10: Cinema is often regarded as a major twentieth-century _____.

- A. soundtrack B. art form C. visual experience D. musical theme

Question 11: A story that relies on predictable clichés may become dull and _____.

A. banal B. subtle C. salient D. ominous

Question 12: Sounds that occur at the same moment as the on-screen action are called _____ sounds.

A. asynchronous B. dissonant C. synchronous D. intrinsic

Question 13: Off-screen voices are an example of _____ sound because their source is not visible.

A. asynchronous B. synchronous C. frenetic D. subtle

Question 14: Composers sometimes use _____ harmonies to create tension and discomfort.

A. salient B. dissonant C. ubiquitous D. intrinsic

Question 15: Many people _____ the importance of sound when discussing great films.

A. merge B. foreshadow C. underestimate D. convention

Exercise 4: Choose the best answer.

Question 16: The word **intrinsic** is closest in meaning to:

A. external B. inherent C. temporary D. artificial

Question 17: The word **frenetic** is closest in meaning to:

A. calm B. careful C. slow D. frantic

Question 18: The word **ominous** is closest in meaning to:

A. threatening B. cheerful C. ordinary D. silent

Question 19: The word **ubiquitous** is closest in meaning to:

A. hidden B. isolated C. rare D. pervasive
