24	settlement	n	/ˈsetlmənt/	sự hòa giải, thỏa thuận / khu định cư	deal, resolution
25	estimate	v/n	/ˈestɪmeɪt/	ước tính, đánh giá	calculate roughly, gauge

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Preservative agent	Chất bảo quản
2	Exclusive importer	Nhà nhập khẩu độc quyền
3	Commercial fleet	Đội tàu thương mại
4	Contagious disease	Bệnh truyền nhiễm
5	Short supply	Nguồn cung khan hiếm
6	Neutral trading policy	Chính sách thương mại trung lập

7	Plantation zone	Vùng trồng trọt / đồn điền
8	Compromise settlement	Thỏa thuận thỏa hiệp / giải pháp hòa giải
9	Volcanic eruption	Sự phun trào núi lửa
10	Trade monopoly	Sự độc quyền thương mại
11	Highly prized	Được đánh giá rất cao / quý giá
12	Foreign power	Cường quốc nước ngoài

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: The local rulers preferred maintaining a _____ to avoid getting entangled in European colonial conflicts.

- A. neutral trading policy B. trade monopoly
C. compromise settlement D. commercial fleet

Question 2: European physicians during the Middle Ages used exotic plant extracts as a useful _____ to extend food freshness.

- A. short supply B. foreign power
C. preservative agent D. plantation zone

Question 3: Merchants quickly realized that spices in extremely _____ could fetch astronomical prices on northern markets.

- A. exclusive importer B. contagious disease
C. short supply D. volcanic eruption

Question 4: A sudden _____ devastated thousands of farming acres, causing widespread economic damage across the islands.

- A. commercial fleet B. plantation zone
C. foreign power D. volcanic eruption

Question 5: Strict legal laws prevented any unauthorized individual from carrying a viable nutmeg _____ off the island.

- A. aril B. seedling C. commodity D. obstacle

Exercise 2: Choose the correct collocation.

Question 6: To secure their complete market domination, the Dutch enforced a strict _____ over the entire region's spice production.

- A. short supply B. volcanic eruption
C. trade monopoly D. preservative agent

Question 7: Merchants built a vast _____ to transport precious spices across perilous maritime trade routes safely.

- A. commercial fleet B. neutral trading policy
C. foreign power D. trade monopoly

Question 8: Smugglers managed to _____ valuable agricultural stock out of the protected islands to cultivate elsewhere.

- A. transplant B. uproot C. compromise D. smuggle

Question 9: The two competing nations finally signed a historic _____ to end years of destructive military clashes.

- A. foreign power B. compromise settlement
C. short supply D. plantation zone

Question 10: The plague was an extraordinarily _____ that wiped out large portions of urban populations during that century.

- A. neutral trading policy B. contagious disease
C. trade monopoly D. preservative agent

Exercise 3: Complete the sentences

Question 11: Colonial authorities chose to systematically _____ any unauthorized trees growing outside official boundaries.

- A. thrive B. estimate C. exploit D. uproot

Question 12: Tropical crops were observed to _____ remarkably well when introduced into the warm climate of the West Indies.

- A. thrive B. seize C. compromise D. uproot

Question 13: British troops decided to _____ strategic ports in the archipelago to undermine the enemy's economic power.

- A. thrive B. seize C. smuggle D. estimate

Question 14: Soil treatment ensures that every exported seed loses its ability to remain _____ in foreign ground.

- A. fertile B. commercial C. contagious D. exclusive

Question 15: Arab traders functioned as the _____ of eastern spices to Western Europe for many centuries.

- A. short supply B. volcanic eruption
C. plantation zone D. exclusive importer

Exercise 4: Choose the best answer.

Question 16: The word **commodity** is closest in meaning to:

- A. obstacle B. product C. agreement D. disease

Question 17: The word **thrive** is closest in meaning to:

- A. struggle B. collapse C. flourish D. disappear

Question 18: The word **seize** is closest in meaning to:

- A. liberate B. protect C. abandon D. capture

Question 19: The word **obstacle** is closest in meaning to:

- A. advantage B. barrier C. solution D. opportunity

Question 20: The word **exploit** is closest in meaning to:

- A. ignore B. destroy C. utilize D. surrender

22	human error	n	/ˌhjuːmənˈerə/	lỗi do con người	mistake, misjudgment
23	annual mileage	n	/ˌænjuəlˈmaɪlɪdʒ/	quãng đường đi hàng năm	yearly distance
24	telepresence	n	/ˌtelɪˈpreznəs /	sự có mặt từ xa (qua công nghệ)	virtual presence
25	mobility provider	n	/məʊˈbɪləti prəˈvaɪdə/	đơn vị cung cấp dịch vụ di chuyển	transport service operator

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Human error	Lỗi do con người
2	Travel autonomy	Sự tự chủ trong di chuyển
3	Car-sharing initiative	Sáng kiến chia sẻ xe / dùng chung xe
4	Annual mileage	Tổng quãng đường đi hàng năm
5	Regulatory challenges	Những thách thức về mặt quy định / pháp lý

6	Technical difficulties	Những khó khăn về mặt kỹ thuật
7	Concrete predictions	Những dự đoán cụ thể / chắc chắn
8	Mass production	Sản xuất hàng loạt
9	Driver assistance system	Hệ thống hỗ trợ người lái
10	Mobility demand	Nhu cầu di chuyển
11	Legal liability	Trách nhiệm pháp lý
12	Rate of turnover	Tốc độ thay mới / đổi mới

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Research confirms that eliminating _____ can dramatically decrease the frequency of traffic accidents on major highways.

A. rate of turnover B. travel autonomy C. annual mileage D. human error

Question 2: Automated vehicles offer elderly passengers unprecedented levels of personal _____ when journeying independently.

A. regulatory challenges B. travel autonomy
C. concrete predictions D. driver assistance system

Question 3: Modern vehicle manufacturers invest heavily in automated machinery to maintain efficient _____ across all assembly lines.

A. legal liability B. technical difficulties C. mass production D. mobility demand

Question 4: Assigning clear legal _____ becomes complicated when a driverless car is involved in an unexpected collision.

A. annual mileage B. car-sharing initiative
C. rate of turnover D. legal liability

Question 5: Urban planners encourage the adoption of a localized _____ to minimize traffic congestion in city centers.

A. human error B. car-sharing initiative
C. regulatory challenge D. concrete prediction

Exercise 2: Choose the correct collocation.

Question 6: Software engineers must overcome serious _____ before autonomous vehicles can navigate severe winter weather conditions safely.

A. technical difficulties B. travel autonomy
C. annual mileage D. rate of turnover

Question 7: Due to more intensive shared usage, autonomous fleet vehicles will accumulate a much higher _____.

A. human error B. annual mileage C. legal liability D. mass production

Question 8: Lawmakers face complex _____ regarding who should be fined when an automated delivery van commits a traffic violation.

A. driver assistance systems B. car-sharing initiatives
C. regulatory challenges D. mobility demands

Question 9: Rapid advancements in telecommunication systems mean that tech trends can _____ within a remarkably short period.

A. conquer hurdles B. gather pace C. prompt choices D. trial capabilities

Question 10: Analysts hesitate to make _____ about long-term automotive market trends due to unpredictable technological shifts.

A. human errors B. technical difficulties
C. annual mileages D. concrete predictions

Exercise 3: Complete the sentences.

Question 11: The company plans to _____ its latest autonomous shuttle model on busy metropolitan streets this coming autumn.

A. trial B. conquer C. prompt D. implementation

Question 12: Higher utilization rates will naturally result in a faster _____ of vehicles within corporate transport fleets.

A. incidence B. hurdle C. turnover D. enforcement

Question 13: Changing consumer preferences could _____ automobile manufacturers to redesign interiors for working and relaxation.

A. conquer B. trial C. prompt D. implement

Question 14: Scientists remain confident that ongoing scientific breakthroughs will eventually _____ all existing technical obstacles.

A. prompt B. trial C. implement D. conquer

Question 15: Electric driverless cars offer a commercially _____ alternative to traditional individual car ownership in dense cities.

A. viable B. occupied C. specialized D. concrete

Exercise 4: Choose the best answer.

Question 16: The word **hurdle** is closest in meaning to:

A. solution B. obstacle C. benefit D. engine

Question 17: The word **viable** is closest in meaning to:

A. impossible B. costly C. feasible D. dangerous

Question 18: The word **conquer** is closest in meaning to:

A. ignore B. multiply C. delay D. overcome

Question 19: The word **incidence** is closest in meaning to:

A. frequency B. cause C. cost D. design

Question 20: The word **robust** is closest in meaning to:

A. fragile B. preliminary C. strong D. temporary

4	Computer-aided design	Thiết kế có sự hỗ trợ của máy tính (CAD)
5	Smooth flow of traffic	Dòng lưu thông xe cộ mượt mà / suôn sẻ
6	Psychological barrier	Rào cản tâm lý
7	Cognitive scientist	Nhà khoa học nghiên cứu về nhận thức

8	Instant feedback	Phản hồi tức thì
9	Abstract thought	Tư duy trừu tượng
10	Functional effect	Hiệu ứng / tác động về mặt chức năng
11	Pedestrian safety	An toàn cho người đi bộ
12	Physical reality	Thực tế vật lý / thực địa

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Urban planners rely heavily on exact _____ when measuring vehicle density during rush hours.

- A. abstract thought B. quantitative data
C. instant feedback D. architectural blueprint

Question 2: Replacing traditional cars with electric buses significantly reduces the overall _____ of city transport.

- A. environmental impact B. psychological barrier
C. cognitive scientist D. functional effect

Question 3: Software relying on _____ allows structural engineers to model massive skyscrapers with remarkable accuracy.

- A. smooth flow of traffic B. physical reality
C. computer-aided design D. abstract thought

Question 4: Physical metal fences installed along major roads often create an unintended _____ for elderly pedestrians crossing the street.

- A. instant feedback B. architectural blueprint
C. quantitative data D. psychological barrier

Question 5: Road infrastructure in suburban areas should be carefully designed to ensure the _____ during peak commuting times.

- A. smooth flow of traffic B. environmental impact
C. abstract thought D. cognitive scientist

Exercise 2: Choose the correct collocation.

Question 6: Choreographers test moves with their dancers in real time to receive _____ regarding movement fluidities.

- A. abstract thought B. instant feedback
C. architectural blueprint D. pedestrian safety

Question 7: A prominent _____ studies how the human brain perceives spatial boundaries in dense urban environments.

- A. smooth flow of traffic B. quantitative data
C. cognitive scientist D. environmental impact

Question 8: Relying solely on _____ without physical testing can lead to urban structures that feel uncomfortable for real residents.

- A. pedestrian safety B. instant feedback
C. psychological barrier D. abstract thought

Question 9: City officials installed new pedestrian zones specifically to promote public mobility and improve local _____.

- A. pedestrian safety B. architectural blueprint
C. cognitive scientist D. computer-aided design

Question 10: Modern architectural software can simulate lighting, but it cannot fully replicate the sensory _____ experienced on site.

- A. quantitative data B. smooth flow of traffic
C. instant feedback D. physical reality

Exercise 3: Complete the sentences

Question 11: Ancient builders used to _____ solutions directly on construction sites rather than strictly following written plans.

- A. improvise B. detach C. prioritize D. simulate

Question 12: One major _____ of relying purely on digital models is that they often simplify complex human behavior.

- A. blueprint B. drawback C. barrier D. disruption

Question 13: Transport authorities decided to _____ bus lanes over private vehicle lanes to encourage sustainable commuting.

- A. improvise B. detach C. prioritize D. simulate

Question 14: Removing central highway barriers caused temporary traffic _____ before long-term flow improvements were achieved.

- A. limitation B. assumption C. precedent D. disruption

Question 15: Advanced virtual reality software can _____ complex crowd movements during emergency evacuations.

- A. simulate B. improvise C. detach D. prioritize

Exercise 4: Choose the best answer.

Question 16: The word **prevalent** is closest in meaning to:

- A. widespread B. rare C. modern D. temporary

Question 17: The word **counter-intuitive** is closest in meaning to:

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Scientists are exploring the potential of _____ to bring back animals that died out thousands of years ago.

- A. carbon emissions B. de-extinction technology
C. moral hazard D. melting permafrost

Question 2: The Tasmanian tiger occupied a specific _____ that no other predator in the island ecosystem could fill.

- A. ecological niche B. calculated risk C. genetic rescue D. mass extinction

Question 3: Reintroducing large mammals into frozen tundra regions could potentially lower global warming effects caused by _____.

- A. genetic traits B. cloning technology
C. melting permafrost D. native species

Question 4: Critics argue that relying on future scientific fixes creates a _____ by encouraging people to ignore habitat destruction today.

- A. mass extinction B. native species C. calculated risk D. moral hazard

Question 5: Conservationists emphasize that introducing genetically altered hybrids into the wild involves taking a carefully _____.

- A. calculated risk B. genetic trait C. carbon emission D. cloning technology

Exercise 2: Choose the correct collocation.

Question 6: Geneticists use advanced _____ to transfer somatic cell nuclei into unfertilized eggs during the reproduction process.

- A. moral hazards B. cloning technology C. mass extinctions D. ecological niches

Question 7: Applying advanced biotechnologies to increase the genetic diversity of endangered populations is known as _____.

- A. carbon emission B. genetic rescue C. melting permafrost D. moral hazard

Question 8: Thicker fur and extra insulating fat are examples of a physical _____ that allowed woolly mammoths to endure arctic cold.

- A. mass extinction B. native species C. calculated risk D. genetic trait

Question 9: Restoring forest disturbance patterns allows various local plants and _____ to colonize and grow properly.

- A. native species B. moral hazards

C. cloning technologies D. melting permafrosts

Question 10: Rapid changes in global climate throughout history have occasionally triggered widespread biodiversity loss and _____.

A. genetic rescue B. ecological niche C. calculated risk D. mass extinction

Exercise 3: Complete the sentences

Question 11: Researchers hope to _____ the exact genes responsible for cold tolerance in ancient mammals.

A. pinpoint B. mitigate C. thrive D. disturb

Question 12: Restoring natural grazing habits in arctic grasslands could help _____ greenhouse gas releases from the soil.

A. thrive B. mitigate C. pinpoint D. stagnate

Question 13: Without periodic natural disturbances, temperate forest ecosystems can become biologically _____ over time.

A. abundant B. contagious C. stagnant D. calculated

Question 14: Scientists caution that unmonitored gene editing might introduce unexpected biological risks and potential safety _____.

A. premising B. specimen C. adaptation D. hazards

Question 15: When an ideal environment with rich resources is restored, endangered flora and fauna begin to _____.

A. thrive B. mitigate C. pinpoint D. stagnate

Exercise 4: Choose the best answer.

Question 16: The word **abundant** is closest in meaning to:

A. scarce B. plentiful C. aggressive D. dangerous

Question 17: The word **mitigate** is closest in meaning to:

A. increase B. ignore C. reduce D. create

Question 18: The word **hazard** is closest in meaning to:

A. advantage B. solution C. discovery D. risk
