PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Adipose tissue	Mô mỡ
2	Genetic structure	Cấu trúc gen
3	Bone density	Mật độ xương
4	Nutrient availability	Sự có sẵn của chất dinh dưỡng
5	Maternity den	Hang sinh sản (của gấu)
6	Conservation effort	Nỗ lực bảo tồn
7	Problem-solving ability	Khả năng giải quyết vấn đề
8	Anecdotal evidence	Bằng chứng truyền miệng / quan sát nhỏ
9	Unusual relationship	Mối quan hệ khác thường

10	Climate change	Biến đổi khí hậu
11	Extreme conditions	Điều kiện cực đoan
12	Heart disease	Bệnh tim mạch

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: High levels of _____ in humans are often linked to a risk of developing severe heart disease or diabetes.

- A. adipose tissue B. problem-solving ability
C. maternity den D. nutrient availability

Question 2: Researchers compared the _____ of polar bears with brown bears to understand their survival mechanism in freezing temperatures.

- A. anecdotal evidence B. extreme conditions
C. genetic structure D. conservation effort

Question 3: During months of fasting inside snow dens, female bears manage to maintain strong bones without losing significant _____.

- A. unusual relationship B. heart disease
C. problem-solving ability D. bone density

Question 4: Bone tissues adapt and change over time depending on physical stress and overall _____.

- A. climate change B. nutrient availability
C. maternity den D. adipose tissue

Question 5: Female polar bears construct a cold snow shelter known as a _____ to give birth and nurse their cubs through winter.

- A. genetic structure B. conservation effort
C. maternity den D. heart disease

Exercise 2: Choose the correct collocation.

Question 6: Protecting threatened Arctic species requires a coordinated global _____ to mitigate habitat loss.

- A. bone density B. adipose tissue
C. unusual relationship D. conservation effort

Question 7: Experiments with tools at the zoo demonstrated that polar bears possess higher _____ than previously assumed.

- A. problem-solving ability B. nutrient availability
C. maternity den D. genetic structure

Question 8: Field reports and _____ suggest that wild bears can form peaceful play bonds with dogs.

- A. heart disease B. anecdotal evidence
C. extreme conditions D. bone density

Question 9: The friendly interaction between a captive polar bear and a human trainer represents an exceptionally _____.

- A. climate change B. adipose tissue
C. unusual relationship D. maternity den

Question 10: Accelerated melting of Arctic sea ice caused by global _____ threatens the survival of wild polar bear populations.

- A. problem-solving ability B. genetic structure
C. conservation effort D. climate change

Exercise 3: Complete the sentences

Question 11: Animals residing near the North Pole must develop specific biological adaptations to withstand _____.

- A. extreme conditions B. bone density
C. heart disease D. unusual relationship

Question 12: Studying the genetic traits that protect bears from high cholesterol could help prevent _____ in humans.

- A. maternity den B. problem-solving ability
C. heart disease D. genetic structure

Question 13: The word **obese** in the passage is closest in meaning to:

- A. energetic B. skinny C. fragile D. overweight

Question 14: The word **deliberate** in the passage is closest in meaning to:

- A. accidental B. intentional C. careless D. sudden

Question 15: The word **agile** in the passage is closest in meaning to:

- A. slow B. heavy C. nimble D. weak

Exercise 4: Choose the best answer.

Question 16: The word **paradox** is closest in meaning to:

- A. certainty B. agreement C. similarity D. contradiction

Question 17: The word **deplete** is closest in meaning to:

- A. exhaust B. build C. increase D. protect

Question 18: The word **capacity** is closest in meaning to:

- A. limitation B. ability C. failure D. weakness

Question 19: The word **dislodge** is closest in meaning to:

- A. attach B. secure C. remove D. hide

Question 20: The word **breakthrough** is closest in meaning to:

- A. delay B. mistake C. obstacle D. advance

3	Immune system	Hệ miễn dịch
4	Inflammatory bowel disease	Bệnh viêm ruột
5	Antibacterial product	Sản phẩm kháng khuẩn
6	Bacterial balance	Cân bằng vi khuẩn
7	Germ theory	Thuyết mầm bệnh

8	Neonatal ward	Khoa sơ sinh
9	Luminescent bacteria	Vi khuẩn phát quang
10	Rare microbial bacterium	Vi khuẩn hiếm
11	Excessive use	Việc sử dụng quá mức
12	Mutually beneficial	Có lợi cho cả hai bên

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: The trillions of microorganisms residing inside our gut work alongside each _____ to maintain our metabolic functions.

- A. human cell B. germ theory C. neonatal ward D. excessive use

Question 2: Instead of viewing bacteria as enemies, we should recognize that humans and microbes share a _____.

- A. bacterial balance B. symbiotic relationship
C. rare microbial bacterium D. luminescent bacteria

Question 3: Consuming a diet high in processed foods can disrupt the bacterial flora and weaken the body's _____.

- A. antibacterial product B. inflammatory bowel disease
C. immune system D. mutually beneficial

Question 4: Overusing antibiotics and processed diets can trigger chronic gastrointestinal conditions such as _____.

- A. germ theory B. neonatal ward
C. human cell D. inflammatory bowel disease

Question 5: Modern households often rely too heavily on every available _____, which unintentionally kills harmless microbes.

- A. antibacterial product B. symbiotic relationship
C. luminescent bacteria D. rare microbial bacterium

Exercise 2: Choose the correct collocation.

Question 6: An overuse of sanitizers in clean urban environments often disrupts the delicate _____ within our digestive tract.

- A. bacterial balance B. human cell C. neonatal ward D. excessive use

Question 7: Louis Pasteur's work in the 19th century established the _____, which framed bacteria solely as dangerous disease-causing agents.

- A. luminescent bacteria B. germ theory
C. rare microbial bacterium D. mutually beneficial

Question 8: To give newborns the best health start, future hospitals might spray protective bacteria inside every _____.

- A. excessive use B. inflammatory bowel disease

C. neonatal ward D. antibacterial product

Question 9: Some species of marine squid protect themselves from deep-sea predators by harboring glowing _____.

A. luminescent bacteria B. germ theory C. human cell D. bacterial balance

Question 10: Scientists managed to rescue endangered frog populations from fatal fungal infections using a _____.

A. mutually beneficial B. rare microbial bacterium

C. symbiotic relationship D. immune system

Exercise 3: Complete the sentences

Question 11: Medical researchers caution against the _____ of household disinfectants, as it strips away protective bacterial shields.

A. neonatal ward B. antibacterial product

C. excessive use D. germ theory

Question 12: The relationship between humans and gut bacteria is described as mutually beneficial, which means both sides derive a clear advantage.

A. harmful B. advantageous C. useless D. destructive

Question 13: The word **enthraling** in the passage is closest in meaning to:

A. boring B. confusing C. captivating D. simple

Question 14: The word **unravel** in the passage is closest in meaning to:

A. complicate B. decipher C. conceal D. destroy

Question 15: The word **disrupt** in the passage is closest in meaning to:

A. balance B. improve C. protect D. disturb

Exercise 4: Choose the best answer.

Question 16: The word **ubiquitous** is closest in meaning to:

A. everywhere B. invisible C. rare D. dangerous

Question 17: The word **potent** is closest in meaning to:

A. weak B. tiny C. powerful D. harmless

Question 18: The word **distaste** is closest in meaning to:

A. affection B. appetite C. interest D. aversion

Question 19: The word **manipulate** is closest in meaning to:

A. control B. ignore C. observe D. damage

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Modern cognitive psychologists rely heavily on _____ to demonstrate that wisdom fluctuates depending on context.

A. intellectual humility B. personal stake C. focal feature D. empirical research

Question 2: An individual's capacity for sound judgment varies dramatically based on the specific _____ in which a choice is made.

A. romantic relationship B. situational context
C. distant observer D. unresolved conflict

Question 3: Recognizing the limits of one's own knowledge is a key component of wisdom known as _____.

A. intellectual humility B. crystallized intelligence
C. third-party perspective D. ego-decentering

Question 4: When people view a problem from an egoistic viewpoint, they tend to focus too narrowly on the immediate _____.

A. empirical research B. situational context
C. focal feature D. romantic relationship

Question 5: Making wise decisions is particularly difficult when individuals have a strong _____ in the final outcome.

A. personal stake B. distant observer
C. unresolved conflict D. ego-decentering

Exercise 2: Choose the correct collocation.

Question 6: Visualizing a stressful situation as if you were a _____ helps reduce immediate emotional interference.

A. focal feature B. distant observer C. romantic relationship D. personal stake

Question 7: Partners in a long-term _____ who adopt an observer viewpoint find it easier to reach a constructive compromise.

A. empirical research B. situational context

C. romantic relationship D. intellectual humility

Question 8: Couples were asked to discuss a long-standing _____ after taking time to reflect from an outsider's standpoint.

A. unresolved conflict B. distant observer

C. third-party perspective D. focal feature

Question 9: The psychological technique of _____ allows people to detach from self-centered interests and see the bigger picture.

A. personal stake B. ego-decentering

C. romantic relationship D. situational context

Question 10: Wisdom shows only a minor correlation with general traits or accumulated knowledge such as _____.

A. empirical research B. focal feature

C. distant observer D. crystallized intelligence

Exercise 3: Complete the sentences

Question 11: Adopting a _____ enables individuals to evaluate personal problems with much greater fairness and objectivity.

A. third-party perspective B. personal stake

C. focal feature D. romantic relationship

Question 12: Stepping back from self-centered biases encourages higher levels of _____ in everyday decision-making.

A. unresolved conflict B. wise reasoning C. distant observer D. personal stake

Question 13: The word **empirical** in the passage is closest in meaning to:

A. theoretical B. observational C. imaginary D. emotional

Question 14: The word **foster** in the passage is closest in meaning to:

A. destroy B. ignore C. encourage D. prevent

Question 15: The word **impartiality** in the passage is closest in meaning to:

A. prejudice B. fairness C. hostility D. confusion

Exercise 4: Choose the best answer.

Question 16: The word **unresolved** is closest in meaning to:

A. settled B. minor C. pending D. ancient

Question 17: The word **retaliate** is closest in meaning to:

A. forgive B. strike back C. surrender D. apologize

Question 18: The word **egocentric** is closest in meaning to:

A. generous B. humble C. objective D. self-centered

1	Merchant ship	Tàu thương mại / Tàu chở hàng
2	Battering ram	Mũi húc bằng đồng (trên chiến thuyền)
3	Mortise and tenon	Kỹ thuật ghép mộng và lỗ mộng
4	Natural phenomena	Các hiện tượng tự nhiên
5	Outer hull	Thân tàu bên ngoài
6	Naval battle	Trận hải chiến
7	Double planking	Lớp ván kép (gia cố thân tàu)

8	Military service	Nghĩa vụ / Dịch vụ quân sự
9	Coastal waters	Vùng biển ven bờ
10	Good visibility	Tầm nhìn tốt (thời tiết quang đãng)
11	Local knowledge	Kiến thức địa phương
12	Pole star	Sao Bắc Đẩu (dùng định hướng)

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Unlike warships designed for shallow areas, large Roman merchant ships required double planking and deep hulls to navigate through deep waters without losing their _____.

A. battering ram B. pole star C. merchant ship D. outer hull

Question 2: To overpower enemy vessels during a _____, Roman warships used a bronze battering ram to pierce timber hulls.

A. naval battle B. local knowledge C. military service D. good visibility

Question 3: Starting from the 6th century BCE, Roman shipbuilders secured planks together using the _____ method rather than stitching them.

A. natural phenomena B. coastal waters C. mortise and tenon D. double planking

Question 4: Rowers on Roman triremes were not slaves, but rather free Roman citizens fulfilling their obligatory _____.

A. military service B. battering ram C. outer hull D. pole star

Question 5: Merchant vessels approaching port were often intercepted by small towboats that dragged them safely to the _____.

A. coastal waters B. local knowledge C. natural phenomena D. quay

Exercise 2: Choose the correct collocation.

Question 6: Because warships had no ballast and a narrow frame, they were strictly built to operate in _____.

A. double planking B. coastal waters C. pole star D. mortise and tenon

Question 7: Ancient Mediterranean sailors navigated by keeping coastal landmarks in sight whenever there was _____.

A. good visibility B. battering ram C. naval battle D. military service

Question 8: In open sea conditions where land was invisible, mariners estimated their course at night using the _____.

A. outer hull B. local knowledge C. pole star D. merchant ship

Question 9: Ancient Roman transport heavily depended on the massive _____, which carried bulk grain, stone, and minerals from distant provinces.
 A. battering ram B. military service C. natural phenomena D. merchant ship

Question 10: Roman sailors relied on personal experience, observation of _____, and local knowledge rather than compasses.
 A. natural phenomena B. double planking C. mortise and tenon D. outer hull

Exercise 3: Complete the sentences

Question 11: To build sturdier trade vessels capable of long-distance voyages, Roman craftspeople applied _____ to the underwater structure.
 A. double planking B. pole star C. battering ram D. military service

Question 12: Navigating through treacherous coastal reefs was significantly easier for captains who possessed extensive _____.
 A. naval battle B. local knowledge C. merchant ship D. good visibility

Question 13: The word **sophisticated** in the passage is closest in meaning to:
 A. primitive B. complex C. outdated D. fragile

Question 14: The word **supersede** in the passage is closest in meaning to:
 A. maintain B. inspect C. destroy D. replace

Question 15: The word **pierce** in the passage is closest in meaning to:
 A. penetrate B. construct C. attach D. protect

Exercise 4: Choose the best answer.

Question 16: The word **crippled** is closest in meaning to:
 A. repaired B. victorious C. disabled D. sunken

Question 17: The word **facilitate** is closest in meaning to:
 A. enable B. hinder C. confuse D. delay

Question 18: The word **conquer** is closest in meaning to:
 A. surrender B. defeat C. assist D. invite

Question 19: The word **systematic** is closest in meaning to:
 A. random B. chaotic C. slow D. methodical

5	Stationary ice	Băng tĩnh (không di chuyển)
6	Mountain pass	Đèo núi, lối đi qua núi
7	Material record	Hồ sơ / Tư liệu hiện vật

8	Radiocarbon date	Niên đại cacbon phóng xạ
9	Trade route	Tuyến đường thương mại
10	Crop failure	Mất mùa
11	International trade	Thương mại quốc tế
12	Overland route	Tuyến đường bộ / Đường đất liền

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: As melting glaciers retreat, items preserved in natural _____ for thousands of years are being exposed.

A. cold storage B. crop failure C. trade route D. material record

Question 2: Fragile _____ like hides and textiles deteriorate quickly once they thaw out and are exposed to air.

A. mountain pass B. organic materials
C. international trade D. stationary ice

Question 3: Due to the swift decay of thawed artefacts, the field of _____ requires quick and systematic fieldwork.

A. climate change B. crop failure C. glacial archaeology D. overland route

Question 4: Researchers focused their search on _____ because moving ice masses tend to crush fragile items at their base.

A. trade route B. material record C. radiocarbon date D. stationary ice

Question 5: Hunters and traders regularly crossed high _____ to transport goods between settlements.

A. mountain passes B. cold storage C. crop failures D. organic materials

Exercise 2: Choose the correct collocation.

Question 6: Recovered bows, arrows, and skis provided archaeologists with a continuous _____ of human activity spanning several millennia.

A. international trade B. material record C. cold storage D. overland route

Question 7: Researchers used _____ to determine the exact age of 153 recovered artefacts and match them with climate shifts.

A. radiocarbon dates B. mountain passes C. crop failures D. organic materials

Question 8: Harsh weather conditions in ancient times often caused widespread _____, forcing villagers to rely heavily on mountain hunting.

A. cold storage B. international trade C. crop failure D. stationary ice

Question 9: Discoveries of heavy transport equipment showed that goods moved extensively along an _____ across mountain passes.

- A. overland route B. organic material C. radiocarbon date D. cold storage

Question 10: Rising global temperatures driven by _____ continue to reveal long-buried historical treasures.

- A. material record B. climate change C. trade route D. crop failure

Exercise 3: Complete the sentences

Question 11: Ancient hunters set up animal traps near high altitude locations where reindeer would _____ during hot summer months.

- A. trade route B. international trade C. congregate D. crop failure

Question 12: Expanding Viking networks heavily promoted _____ across North America, Europe, and the Middle East.

- A. international trade B. cold storage C. stationary ice D. material record

Question 13: The word **daunting** in the passage is closest in meaning to:

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Agricultural yield	Năng suất nông nghiệp
2	Climate change	Biến đổi khí hậu
3	Genetic switch	Công tắc di truyền / Cơ chế kích hoạt gen
4	Night-time heat	Nhiệt độ ban đêm

5	Dark reversion	Sự đảo ngược trong bóng tối
6	Thermal stress	Căng thẳng/Sốc nhiệt (do nhiệt độ quá cao)
7	Molecular scalpel	"Dao mổ" phân tử (công cụ chỉnh sửa gen)
8	Temperature sensitivity	Độ nhạy với nhiệt độ
9	Seasonal change	Thay đổi theo mùa
10	Growth-suppressing state	Trạng thái ức chế tăng trưởng
11	Plant biology	Sinh học thực vật
12	Plant genetics	Di truyền học thực vật

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Rising global temperatures driven by _____ pose a massive challenge to ensuring future food security.

A. thermal stress B. plant genetics C. genetic switch D. climate change

Question 2: Scientists hope to double global _____ by breeding crops that can withstand extreme heat conditions.

A. agricultural yields B. dark reversions
C. molecular scalpels D. seasonal changes

Question 3: Phytochromes act as a _____ that turns specific plant development genes on or off based on light and heat.

A. night-time heat B. genetic switch
C. thermal stress D. growth-suppressing state

Question 4: During dark hours, the process of _____ determines how fast phytochrome molecules return to their inactive state.

A. plant biology B. seasonal change C. dark reversion D. agricultural yield

Question 5: High levels of _____ can significantly drop wheat and rice harvests by approximately 10% per degree of warming.

A. thermal stress B. molecular scalpel
C. plant genetics D. climate change

Exercise 2: Choose the correct collocation.

Question 6: Modern gene-editing tools act like a _____ to precisely adjust plant DNA for better climate adaptation.

A. night-time heat B. temperature sensitivity
C. molecular scalpel D. dark reversion

Question 7: Species with high _____ can blossom months early if winter temperatures remain unusually warm.

A. growth-suppressing state B. agricultural yield
C. genetic switch D. temperature sensitivity

Question 8: When phytochromes remain active in cold weather, they keep the plant in a _____ to prevent premature budding.

- A. seasonal change B. thermal stress
C. growth-suppressing state D. night-time heat

Question 9: Plants measure _____ to read seasonal transitions and adjust their springtime development accordingly.

- A. molecular scalpel B. night-time heat
C. plant biology D. agricultural yield

Question 10: Breakthroughs in _____ enable researchers to identify and alter key temperature-sensing genes in crops.

- A. seasonal change B. dark reversion C. thermal stress D. plant genetics

Exercise 3: Complete the sentences

Question 11: The new discovery in _____ explains the molecular mechanism behind how plants respond to environmental heat.

- A. genetic switch B. plant biology
C. agricultural yield D. molecular scalpel

Question 12: Trees and flowers alter their flowering schedules in response to _____ brought on by winter and spring.

- A. thermal stress B. dark reversion
C. seasonal changes D. growth-suppressing state

Question 13: The word **resilient** in the passage is closest in meaning to:

- A. fragile B. tough C. sensitive D. vulnerable

Question 14: The word **pinpoint** in the passage is closest in meaning to:

- A. identify B. overlook C. complicate D. estimate

Question 15: The word **accelerate** in the passage is closest in meaning to:

- A. delay B. stop C. prevent D. speed up

Exercise 4: Choose the best answer.

Question 16: The word **restrict** is closest in meaning to:

- A. limit B. encourage C. expand D. support

Question 17: The word **dictate** is closest in meaning to:

- A. follow B. request C. determine D. ignore

Question 18: The word **culmination** is closest in meaning to:

- A. beginning B. peak C. failure D. cause

Question 19: The word **precise** is closest in meaning to:

- A. rough B. exact C. vague D. general

Question 20: The word **alter** is closest in meaning to:

- A. preserve B. copy C. maintain D. modify

5	Industrial heritage	Di sản công nghiệp
6	Vertical lift	Cơ chế nâng thẳng đứng

7	Water-filled gondola	Khoang chứa đầy nước
8	Energy efficiency	Hiệu quả năng lượng
9	Architectural landmark	Công trình kiến trúc biểu tượng
10	Sustainable design	Thiết kế bền vững
11	Tourist attraction	Điểm thu hút du lịch
12	Mechanical balance	Sự cân bằng cơ học

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: The ancient Persians built long subterranean tunnels to secure a dependable _____ for dry regions.

A. mineral extraction B. water supply C. geological problem D. lateral link

Question 2: In the qanat system, workers dug every 30 to 60 meters to sink a _____ into the earth.

A. advance direction B. construction rate C. vertical shaft D. solid rock

Question 3: Shafts were positioned along a straight path at _____ to maintain accurate tunnel alignment.

A. regular intervals B. mineral extractions
C. counter-excavation methods D. direct routes

Question 4: Cutting through massive mountains where vertical digging was impossible required the _____.

A. water supply B. counter-excavation method
C. lateral link D. construction rate

Question 5: Surveyors constantly verified their _____ to ensure both tunneling teams would meet in the middle.

A. geological problem B. solid rock C. advance direction D. mineral extraction

Exercise 2: Choose the correct collocation.

Question 6: Underground mining tunnels were excavated primarily for the purpose of valuable _____.

A. vertical shaft B. regular interval C. mineral extraction D. water supply

Question 7: Progress slowed dramatically whenever builders encountered dense, unforgiving _____ underground.

A. solid rock B. lateral link C. counter-excavation method D. direct route

Question 8: When two working teams missed each other inside the mountain, engineers had to dig a _____ to connect both tunnels.

A. construction rate B. advance direction C. regular interval D. lateral link

Question 9: Historical records show that the average _____ through soft soil was far higher than through hard stone.

- A. mineral extraction B. geological problem
C. construction rate D. water supply

Question 10: Tunnels cut through high ridges to allow roads to follow a short, _____ across difficult terrain.

- A. direct route B. vertical shaft C. regular interval D. solid rock

Exercise 3: Complete the sentences

Question 11: Unforeseen shifts in underground rock layers caused a serious _____ that forced builders to alter their course.

- A. lateral link B. geological problem C. water supply D. construction rate

Question 12: Vertical shafts provided essential air flow, ensuring proper _____ for the laborers digging deep underground.

- A. ventilation B. geometry C. obstacle D. inscription

Question 13: The word **obstacle** in the passage is closest in meaning to:

- A. assistance B. opening C. pathway D. barrier

Question 14: The word **divert** in the passage is closest in meaning to:

- A. redirect B. collect C. store D. absorb

Question 15: The word **practical** in the passage is closest in meaning to:

- A. theoretical B. complex C. feasible D. imaginary

Exercise 4: Choose the best answer.

Question 16: The word **excavate** in the passage is closest in meaning to:

- A. fill B. dig C. cover D. design

Question 17: The word **deviate** in the passage is closest in meaning to:

- A. follow B. stray C. continue D. align

Question 18: The word **straightforward** in the passage is closest in meaning to:

- A. complicated B. confusing C. indirect D. direct

Question 19: The word **encounter** in the passage is closest in meaning to:

- A. avoid B. ignore C. escape D. face

Question 20: The word **reliable** in the passage is closest in meaning to:

- A. dependable B. uncertain C. temporary D. weak

Question 1: Continuous usage of smartphones and tablets exposes people to a fast-paced _____ that affects attention spans.

- A. chronological order B. false information
C. digital culture D. intellectual process

Question 2: Shallow browsing habits often result in a notable decline in students' overall _____.

- A. unchecked information B. reading comprehension
C. technological innovation D. reading circuit

Question 3: Modern readers often lack the focus needed for _____, preferring quickly digestible snippets of text.

- A. deep reading B. cognitive impatience
C. digital screen D. critical analysis

Question 4: Constant access to social media feeds has cultivated a widespread feeling of _____ among young learners.

- A. false information B. chronological order
C. unchecked information D. cognitive impatience

Question 5: Evaluating long-form, complex essays thoroughly requires a well-developed capacity for _____.

- A. critical analysis B. reading circuit C. digital culture D. intellectual process
