PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Fast-track domestication	Quá trình thuần hóa siêu tốc
2	Genome editing technique	Kỹ thuật chỉnh sửa bộ gen
3	Genetic diversity	Sự đa dạng di truyền
4	Commercial crop	Cây trồng mang tính thương mại
5	Regulatory approval	Sự phê chuẩn từ cơ quan chức năng
6	Staple crop	Cây lương thực chủ lực

7	Drought-tolerant plant	Cây trồng có khả năng chịu hạn
8	Red pigment	Sắc tố đỏ
9	Wild strain	Giống/chủng hoang dã
10	Sprawling growth habit	Tập tính sinh trưởng mọc bò lan
11	Bacterial spot race	Bệnh đốm vi khuẩn ở cây trồng
12	Food supply	Nguồn cung cấp thực phẩm

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Using CRISPR technology has enabled scientists to achieve a modern process of _____.

- A. regulatory approval B. fast-track domestication
C. sprawling growth habit D. staple crop

Question 2: Modern precise plant breeding heavily relies on the application of a revolutionary _____.

- A. commercial crop B. genome editing technique
C. food supply D. red pigment

Question 3: Selective breeding over centuries inadvertently reduced essential _____ among modern commercial crops.

- A. bacterial spot race B. drought-tolerant plant
C. genetic diversity D. regulatory approval

Question 4: Groundcherries hold great potential to be mass-produced and marketed as a profitable _____.

- A. wild strain B. fast-track domestication
C. staple crop D. commercial crop

Question 5: Before gene-edited fruits can be sold in public markets, researchers must secure official _____.

- A. regulatory approval B. food supply
C. genome editing technique D. red pigment

Exercise 2: Choose the correct collocation.

Question 6: Wheat, rice, and corn represent essential foods that serve as the main _____ for most human populations.

- A. sprawling growth habit B. staple crop
C. wild strain D. bacterial spot race

Question 7: Developing a new _____ will help farmers maintain yield even as extreme weather and heatwaves increase.

- A. fast-track domestication B. regulatory approval
C. drought-tolerant plant D. commercial crop

Question 8: The wild tomato variant contains a significantly higher concentration of beneficial _____ than store-bought ones.

- A. red pigment B. food supply C. genome editing technique D. genetic diversity

Question 9: Scientists prefer using a robust _____ because it retains natural resistance genes lost in modern varieties.

A. commercial crop B. regulatory approval C. staple crop D. wild strain

Question 10: The traditional wild groundcherry plant poses harvesting difficulties due to its unmanageable _____.

A. fast-track domestication B. sprawling growth habit
C. red pigment D. food supply

Exercise 3: Complete the sentences

Question 11: Biologists edited the tomato plant's genetic code to ensure it could easily _____ in harsh, high-salinity soils.

A. catapult B. mimic C. thrive D. domesticate

Question 12: The new gene-editing method allows researchers to _____ desirable evolutionary traits within just a few years.

A. reintroduce B. devastating C. obscure D. aromatic

Question 13: A sudden outbreak of fungal rust can be completely _____ to agricultural yields across an entire country.

A. compact B. devastating C. drought tolerant D. salt tolerant

Question 14: Gene editing techniques could soon _____ obscure wild species directly into mainstream global agriculture.

A. thrive B. mimic C. reintroduce D. catapult

Question 15: The word **obscure** in the passage is closest in meaning to:

A. little-known B. famous C. toxic D. expensive

Exercise 4: Choose the best answer.

Question 16: The word **thrive** in the passage is closest in meaning to:

A. decay B. struggle C. flourish D. dry

Question 17: The word **aromatic** in the passage is closest in meaning to:

A. tasteless B. fragrant C. odorless D. bitter

Question 18: The word **mimic** in the passage is closest in meaning to:

A. replicate B. destroy C. reject D. invent

Question 19: The word **compact** in the passage is closest in meaning to:

A. widespread B. dense C. tall D. loose

Question 20: The word **mutation** in the passage is closest in meaning to:

A. stabilization B. copy C. similarity D. alteration

2	Trial and error	Phương pháp thử và sai
3	Cumulative nature	Tính chất tích lũy
4	Methodical investigation	Sự điều tra có phương pháp
5	Happy accident	Sự tình cờ may mắn
6	Law of Effect	Quy luật Tác động
7	Natural selection	Sự chọn lọc tự nhiên

8	Intelligent design	Thiết kế thông minh
9	Creative genius	Thiên tài sáng tạo
10	Conventional wisdom	Quan niệm thông thường
11	Fanciful theory	Lý thuyết mang tính tưởng tượng
12	Speed advantage	Lợi thế về tốc độ

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Breakthroughs in human history are rarely single events, but rather a result of a gradual process of _____.

- A. natural selection B. intelligent design
C. creative genius D. trial and error

Question 2: Many breakthrough inventions do not emerge from meticulous planning, but rather from a completely fortunate _____.

- A. conventional wisdom B. happy accident C. speed advantage D. Law of Effect

Question 3: Modern scientific progress builds upon previous discoveries, demonstrating an inherently strong _____.

- A. methodical investigation B. fanciful theory
C. cumulative nature D. intelligent design

Question 4: Society frequently attributes revolutionary breakthroughs to the sole brilliance of an exceptional _____.

- A. Law of Effect B. speed advantage
C. natural selection D. creative genius

Question 5: Popular belief often clings to long-held assumptions, which are widely accepted as simple _____.

- A. conventional wisdom B. trial and error
C. happy accident D. cumulative nature

Exercise 2: Choose the correct collocation.

Question 6: Thorndike's influential psychological principle explaining behavioral adaptation is widely known as the _____.

- A. speed advantage B. Law of Effect
C. natural selection D. fanciful theory

Question 7: Biological organisms evolve over generations through random variations subject to the principles of _____.

- A. trial and error B. intelligent design
C. natural selection D. happy accident

Question 8: The novel jockey posture in horse racing unexpectedly provided competitors with a significant _____.

- A. speed advantage B. cumulative nature
C. conventional wisdom D. Law of Effect

Question 9: Nicholson proposed several unusual atomic models that were initially dismissed as merely a _____.

- A. happy accident B. trial and error C. cumulative nature D. fanciful theory

Question 10: Critics argue that relying on the concept of _____ ignores the mechanical and evolutionary steps behind creation.

- A. speed advantage B. intelligent design
C. Law of Effect D. natural selection

Exercise 3: Complete the sentences

Question 11: The researcher sought to _____ meaningful insights from the vast collection of historical experimental data.

- A. constrain B. postulate C. glean D. undermine

Question 12: Spencer Silver created a mild adhesive by chance, illustrating how pure _____ can lead to commercial success.

- A. serendipity B. provenance C. predecessor D. endeavor

Question 13: Niels Bohr developed his groundbreaking atomic model by building upon the ideas of an _____ mathematical physicist.

- A. arbitrary B. unheralded C. banal D. Naïve

Question 14: Overly restrictive guidelines may inadvertently _____ the creative generation of novel ideas in research labs.

- A. confer B. invoke C. glean D. constrain

Question 15: The word **predecessor** in the passage is closest in meaning to:

- A. forerunner B. rival C. descendant D. assistant

Exercise 4: Choose the best answer.

Question 16: The word **undermine** in the passage is closest in meaning to:

- A. strengthen B. praise C. weaken D. confirm

Question 17: The word **shrewd** in the passage is closest in meaning to:

- A. foolish B. astute C. careless D. generous

Question 18: The word **banal** in the passage is closest in meaning to:

- A. ordinary B. exciting C. extraordinary D. complex

Question 19: The word **provenance** in the passage is closest in meaning to:

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Although the thylacine physically looked like a wild dog, it was only a _____.

- A. superficial resemblance B. prime habitat
- C. captive specimen D. definitive evidence

Question 2: The open eucalyptus forest was considered the _____ for thylacines before their population dropped.

- A. European settler B. prime habitat
- C. official protection D. bounty hunter

Question 3: Thylacines were slow runners that relied on scent and stamina during a _____.

- A. prime breeding season B. definitive evidence
- C. long-distance chase D. superficial resemblance

Question 4: Sheep farmers and ruthless _____ actively hunted the animal, accelerating its eventual downfall.

- A. superficial resemblance B. long-distance chase
- C. official protection D. bounty hunter

Question 5: Intense eradication campaigns in the 1830s triggered a _____ in the wild population of Tasmania.

- A. European settler B. captive specimen
- C. dramatic decline D. prime habitat

Exercise 2: Choose the correct collocation.

Question 6: Tasmanian authorities delayed passing laws for _____, granting immunity only right before the last wild thylacine died.

- A. long-distance chase B. official protection
- C. prime breeding season D. superficial resemblance

Question 7: Recent searching expeditions have failed to produce any _____ that the species still roams the wilderness.

- A. bounty hunter B. dramatic decline
- C. definitive evidence D. European settler

Question 8: The arrival of the _____ introduced wild dogs and destroyed much of the native wildlife's environment.

- A. European settler B. captive specimen
- C. prime habitat D. official protection

Question 9: Temporary protection was initially introduced in December because it was believed to be their _____.

- A. superficial resemblance B. bounty hunter
C. definitive evidence D. prime breeding season

Question 10: The very last known _____ died in captivity at Hobart Zoo in September 1936.

- A. long-distance chase B. captive specimen
C. dramatic decline D. European settler

Exercise 3: Complete the sentences

Question 11: Scientists noted that the animal's stomach could easily _____ to store large amounts of meat after a successful hunt.

- A. diminish B. coincide C. distend D. bask

Question 12: The famous naturalist John Gould accurately predicted the imminent _____ of the thylacine in his book.

- A. demise B. pursuit C. specimen D. expedition

Question 13: Although thylacines were mainly _____, observers occasionally recorded them sunbathing during the day.

- A. carnivorous B. nocturnal C. definitive D. superficial

Question 14: Repeated scientific expeditions into remote forests failed to find living thylacines and prevent their complete _____.

- A. scarcity B. pursuit C. resemblance D. extermination

Question 15: The word **demise** in the passage is closest in meaning to:

- A. death B. birth C. arrival D. discovery

Exercise 4: Choose the best answer.

Question 16: The word **scarcity** in the passage is closest in meaning to:

- A. abundance B. presence C. shortage D. safety

Question 17: The word **distend** in the passage is closest in meaning to:

- A. shrink B. expand C. break D. bleed

9	Carbon emissions	Lượng khí thải carbon
10	High yield	Năng suất cao
11	Habitat destruction	Sự phá hủy môi trường sống
12	Supply chain	Chuỗi cung ứng

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Environmentalists warn that replacing primary rainforests with oil palms poses a severe threat to _____.

- A. sustainable palm oil B. bone of contention
C. global biodiversity D. high yield

Question 2: Striking a fair decision between economic growth in poor regions and ecological preservation remains a major _____.

- A. supply chain B. bone of contention C. habitat destruction D. virgin forest

Question 3: Researchers emphasize the need to find a reasonable _____ that weighs human livelihoods against nature conservation.

- A. carbon emissions B. dwindling species
C. utilitarian balance D. industrial scale

Question 4: Land clearing in Southeast Asia to establish massive monocultures is conducted on an unprecedented _____.

- A. global biodiversity B. bone of contention
C. supply chain D. industrial scale

Question 5: Certification programs were initiated to ensure consumers have access to verified _____ on global markets.

- A. sustainable palm oil B. habitat destruction
C. carbon emissions D. virgin forest

Exercise 2: Choose the correct collocation.

Question 6: The rapid destruction of ecosystems directly threatens the survival of many _____ in affected tropical forests.

- A. high yield B. dwindling species
C. utilitarian balance D. bone of contention

Question 7: The bird's nest fern plays a vital ecological role in maintaining forest biodiversity as a crucial _____.

- A. global biodiversity B. supply chain
C. keystone species D. industrial scale

Question 8: Environmental groups strictly forbid the clearing of any untouched _____ for agricultural development.

- A. virgin forest B. habitat destruction
C. carbon emissions D. sustainable palm oil

Question 9: Compared to alternative vegetable crops, oil palm plantations generate an exceptionally _____ per hectare.

- A. utilitarian balance B. dwindling species
C. bone of contention D. high yield

Question 10: Forest loss and agricultural land expansion are recognized as leading causes of severe _____.

- A. global biodiversity B. habitat destruction
C. supply chain D. keystone species

Exercise 3: Complete the sentences

Question 11: Oil palm crops are able to _____ substantial amounts of atmospheric carbon compared to certain annual crops.

- A. boycott B. devote C. sequester D. reintroduce

Question 12: Activists urged environmental groups and consumers worldwide to completely _____ products containing non-certified oil.

- A. boycott B. seize C. thrive D. yield

Question 13: Experts argue that a simple blanket ban ignores complex economic factors, advocating instead for a more _____ perspective.

- A. sterile B. nuanced C. epiphytic D. utilitarian

Question 14: Planting ferns within sterile plantations could allow these agricultural areas to recover their lost ecological _____.

- A. preservation B. contention C. property D. biodiversity

Question 15: The word **dwindling** in the passage is closest in meaning to:

- A. shrinking B. expanding C. thriving D. adapting

Exercise 4: Choose the best answer.

Question 16: The word **sequester** in the passage is closest in meaning to:

- A. release B. emit C. absorb D. burn

Question 17: The word **nuanced** in the passage is closest in meaning to:

- A. simple B. subtle C. extreme D. false

Question 18: The word **sterile** in the passage is closest in meaning to:

- A. diverse B. fertile C. lush D. barren

25	incorporate	v	/ɪnˈkɔːpəreɪt/	kết hợp, sáp nhập	integrate, include, absorb

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Slum clearance	Sự giải tỏa các khu nhà ổ chuột
2	Bedrock myth	Huyền thoại về tầng đá gốc

3	Return on investment	Tỷ suất lợi nhuận đầu tư
4	Load-bearing wall	Tường chịu lực
5	Empirical research	Nghiên cứu thực nghiệm
6	Grid system	Hệ thống quy hoạch dạng bàn cờ
7	Subterranean tour	Cuộc tham quan dưới lòng đất
8	Economic height	Chiều cao tối ưu về mặt kinh tế
9	Urban economic theory	Lý thuyết kinh tế đô thị
10	Square footage	Diện tích sử dụng (foot vuông)
11	Immigrant enclave	Khu dân cư người nhập cư
12	Cheap credit	Tín dụng giá rẻ / lãi suất thấp

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: The author challenged the idea that developers avoided certain city zones due to difficulties in performing _____.

A. slum clearance B. cheap credit C. economic height D. load-bearing wall

Question 2: Jason Barr uses detailed data to debunk the long-standing _____, proving foundation costs did not prevent building high-rises.

A. square footage B. bedrock myth C. immigrant enclave D. subterranean tour

Question 3: Developers choose their ideal building height by calculating the maximum potential _____.

A. grid system B. urban economic theory
C. return on investment D. empirical research

Question 4: Early modern architecture shifted away from thick _____ toward steel framing to maximize interior space.

A. bedrock myth B. cheap credit C. immigrant enclave D. load-bearing wall

Question 5: The book relies heavily on quantitative data and _____ to support its arguments about urban expansion.

A. economic height B. slum clearance
C. subterranean tour D. empirical research

Exercise 2: Choose the correct collocation.

Question 6: New York City's early layout was heavily influenced by the adoption of a formal _____ in 1811.

A. load-bearing wall B. grid system
C. cheap credit D. return on investment

Question 7: Chapter one takes readers on a unique _____ to explore the hidden geological formations underneath Manhattan.

A. bedrock myth B. empirical research
C. subterranean tour D. slum clearance

Question 8: From a societal perspective, the ideal stature of a building is referred to by economists as its _____.

- A. economic height B. immigrant enclave
C. grid system D. square footage

Question 9: Students studying city development rely on principles from _____ to understand real estate patterns.

- A. load-bearing wall B. subterranean tour
C. return on investment D. urban economic theory

Question 10: Modern steel frames eliminated bulky masonry, dramatically increasing usable _____ inside high-rise buildings.

- A. bedrock myth B. square footage C. empirical research D. cheap credit

Exercise 3: Complete the sentences

Question 11: The construction costs were not _____ high, meaning foundation digging remained a minor fraction of overall budget.

- A. viability B. exuberance C. prohibitively D. skeletal

Question 12: Workers utilized pressurized watertight chambers called _____ to dig deep past the water table until hitting bedrock.

- A. caissons B. enclaves C. epilogues D. compilations

Question 13: While market enthusiasm was high, cheap borrowing alone did not explain the construction boom's ultimate _____.

- A. subsoil B. tenement C. viability D. amenity

Question 14: In the book's final _____, the author shifts focus to future urban planning policies and climate change challenges.

- A. footage B. cluster C. claim D. epilogue

Question 15: The word **empirical** in the passage is closest in meaning to:

- A. observational B. theoretical C. imaginary D. historical

Exercise 4: Choose the best answer.

Question 16: The word **prohibitively** in the passage is closest in meaning to:

- A. reasonably B. slightly C. excessively D. normally

Question 17: The word **viability** in the passage is closest in meaning to:

- A. impossibility B. feasibility C. popularity D. failure

Question 18: The word **subterranean** in the passage is closest in meaning to:

- A. underground B. coastal C. mountainous D. elevated

Question 19: The word **exuberance** in the passage is closest in meaning to:

- A. sadness B. enthusiasm C. doubt D. caution

Question 20: The word **enclave** in the passage is closest in meaning to:

- A. wilderness B. office C. landmark D. neighborhood

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Pest control service	Dịch vụ kiểm soát sâu bệnh
2	Biological pest suppressor	Tác nhân kiểm soát sâu bệnh sinh học
3	State-of-the-art recorder	Thiết bị ghi âm hiện đại
4	DNA barcoding technique	Kỹ thuật mã hóa vạch DNA
5	Continuous forest	Khu rừng liền mạch

6	Insect pest infestation	Sự bùng phát sâu bệnh
7	High stakes	Rủi ro / lợi ích rất lớn
8	Mutually beneficial relationship	Mối quan hệ cùng có lợi
9	Boost crop yields	Tăng năng suất cây trồng
10	Sustainable livelihood	Kế sinh nhai bền vững
11	Staple crop	Cây lương thực chính
12	Subsistence farmer	Nông dân tự cung tự cấp

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: The loss of natural habitat in Madagascar is mainly driven by subsistence farmers who clear land to plant their main _____.

- A. staple crop B. continuous forest
C. state-of-the-art recorder D. biological pest suppressor

Question 2: Researchers used a _____ to capture ultrasonic echolocation frequencies emitted by foraging bats.

- A. DNA barcoding technique B. mutually beneficial relationship
C. sustainable livelihood D. state-of-the-art recorder

Question 3: Crop diseases and severe _____ can reduce agricultural outputs and force farmers to expand into forested areas.

- A. pest control service B. continuous forest
C. insect pest infestation D. high stakes

Question 4: Encouraging bats to nest near agricultural fields establishes a _____ between humans and native fauna.

- A. staple crop B. DNA barcoding technique
C. subsistence farmer D. mutually beneficial relationship

Question 5: Protecting native species provides vital natural ecosystem services that help _____ for local agricultural communities.

- A. boost crop yields B. high stakes
C. continuous forest D. state-of-the-art recorder

Exercise 2: Choose the correct collocation.

Question 6: Bat activity was significantly lower in areas covered by _____ compared to open agricultural landscapes.

- A. pest control service B. continuous forest
C. staple crop D. sustainable livelihood

Question 7: Scientists applied advanced _____ to identify the specific prey species found in bat fecal samples.

- A. high stakes B. insect pest infestation
C. DNA barcoding technique D. subsistence farmer

Question 8: The decision to preserve biodiversity involves _____ for both environmentalists and rural populations.

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Causal link	Mối liên hệ nguyên nhân - kết quả
2	Mediocre literacy rate	Tỷ lệ biết chữ ở mức trung bình
3	Handwritten inventory	Bản kê khai tài sản viết tay
4	Demographic reconstruction	Sự tái dựng bức tranh nhân khẩu học

5	Tipping point	Điểm bùng phát / ngưỡng thay đổi
6	Economic growth	Sự tăng trưởng kinh tế
7	Guild ordinance	Sắc lệnh / quy định của phường hội
8	Productive activity	Hoạt động sản xuất hiệu quả
9	Industrial innovation	Đổi mới sáng tạo trong công nghiệp
10	Economic institution	Thể chế kinh tế
11	Cross-country analysis	Phân tích so sánh giữa các quốc gia
12	Merchant association	Hiệp hội thương gia

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Economists have long struggled to find a direct _____ proving that education alone causes national wealth.

A. causal link B. guild ordinance C. handwritten inventory D. tipping point

Question 2: Researchers analyzed every ancient _____ found in regional archives to track individual wealth and possessions over centuries.

A. cross-country analysis B. handwritten inventory
C. economic institution D. mediocre literacy rate

Question 3: Despite having only a _____ compared to its neighbors, 18th-century England industrialised rapidly.

A. tipping point B. guild ordinance
C. mediocre literacy rate D. industrial innovation

Question 4: Strict legal regulations imposed by a local _____ often prevented women from freely participating in skilled labor markets.

A. causal link B. cross-country analysis
C. demographic reconstruction D. guild ordinance

Question 5: Without well-structured _____, heavy investment in public education may fail to translate into tangible economic development.

A. economic institutions B. mediocre literacy rates
C. handwritten inventories D. tipping points

Exercise 2: Choose the correct collocation.

Question 6: Scholars performed a complete _____ of the village population by cross-referencing census data, birth records, and tax lists.

A. industrial innovation B. demographic reconstruction
C. causal link D. merchant association

Question 7: Powerful trade organizations and each regional _____ actively protected their monopolies by blocking outside competitors.

A. cross-country analysis B. mediocre literacy rate
C. merchant association D. handwritten inventory

Question 8: Historical records show that powerful craft guilds routinely suppressed simple _____ to eliminate potential competition.

- A. demographic reconstruction B. causal link
C. tipping point D. industrial innovation

Question 9: Researchers want to determine whether schooling needs to reach a critical _____ before it impacts overall national output.

- A. guild ordinance B. mediocre literacy rate
C. merchant association D. tipping point

Question 10: Modern empirical studies using global dataset comparisons rely heavily on detailed _____ to test development models.

- A. causal link B. cross-country analysis
C. industrial innovation D. demographic reconstruction

Exercise 3: Complete the sentences

Question 11: Social historians spent decades working to _____ massive historical archives detailing early European life.

- A. chastise B. industrialise C. compile D. stifle

Question 12: Severe institutional barriers and market monopolies effectively _____ the economic progress of early German states.

- A. stifled B. compiled C. chastised D. industrialised

Question 13: The local court decided to publicize a formal reprimand and _____ the young women for reading during religious services.

- A. industrialise B. compile C. chastise D. stifle

Question 14: Discriminatory laws that restrict women from entering lucrative trades create an artificial _____ to productivity.

- A. inventory B. asset C. indicator D. restriction

Question 15: The word **conundrum** in the passage is closest in meaning to:

- A. puzzle B. solution C. agreement D. explanation

Exercise 4: Choose the best answer

Question 16: The word **stifled** in the passage is closest in meaning to:

- A. encouraged B. expanded C. suppressed D. supported

Question 17: The word **mediocre** in the passage is closest in meaning to:

- A. exceptional B. average C. superior D. terrible

Question 18: The word **defiance** in the passage is closest in meaning to:

- A. resistance B. acceptance C. obedience D. agreement

Question 19: The word **compile** in the passage is closest in meaning to:

- A. scatter B. assemble C. destroy D. ignore
