URBAN FARMING

Topic: Agriculture • Sustainable Technology • Urban Planning • Food Security

PART 1. VOCABULARY

STT	Vocabulary	POS	IPA	Meaning	Synonyms
1	aeroponic	adj	/,eə'reʊ'pɒnɪk/ /	thuộc khí canh (trồng không dùng đất)	soil-free, air-grown
2	resplendently	adv	/rɪ'splendəntli/ /	rực rỡ, long lẫy	brilliantly, splendidly, dazzlingly
3	dangle	v	/'dæŋɡl/	đung đưa, treo lủng lẳng	hang, swing, suspend
4	aubergine	n	/'əʊbəʒi:n/	quả cà tím	eggplant
5	chard	n	/tʃɑ:d/	rau cải cầu vồng	Swiss chard, leafy vegetable
6	pitch	n	/pɪtʃ/	sân thi đấu (bóng đá)	field, ground, stadium
7	punnet	n	/'pʌnɪt/	hộp nhỏ đựng hoa quả	small basket, fruit tub
8	constraint	n	/kən'streɪnt/	sự hạn chế, rào cản	limitation, restriction, barrier
9	target	v/n	/'tɑ:ɡɪt/	nhắm tới, mục tiêu	aim at, goal, objective
10	showcase	n	/'ʃəʊkeɪs/	cơ hội/nơi trưng bày mẫu	display, demonstration, exhibit
11	flourishing	adj	/'flaʊrɪʃɪŋ/	phát triển rực rỡ, thịnh vượng	thriving, booming, prospering
12	enquiry	n	/ɪn'kwɪəri/	yêu cầu thông tin, thắc mắc	query, question, request
13	pesticide	n	/'pestɪsaɪd/	thuốc trừ sâu	insecticide, chemical spray
14	intensive	adj	/ɪn'tensɪv/	thâm canh, quy mô lớn	high-yield, concentrated
15	generator	n	/'dʒenəreɪtə(r)/	nguồn phát ra, tác nhân tạo ra	producer, source, cause

16	withstand	v	/wɪð'stænd/	chịu đựng, chống chịu	endure, resist, tolerate
17	wholesaler	n	/'həʊlseɪlə(r)/	nhà bán buôn, đại lý	distributor, bulk seller
18	exhausted	adj	/ɪg'zɔ:stɪd/	cạn kiệt (dinh dưỡng đất)	depleted, drained, worn out
19	yield	n/v	/ji:ld/	sản lượng, năng suất	harvest, output, produce
20	phenomenon	n	/fə'nɒmɪnən/	hiện tượng	occurrence, trend, event
21	disused	adj	/,dɪs'ju:zd/	bị bỏ hoang, không sử dụng	abandoned, neglected, unused
22	fraction	n	/'frækʃn/	phần nhỏ, tỷ lệ nhỏ	small part, segment, portion
23	organic	adj	/ɔ: 'gæɪnɪk/	hữu cơ	natural, pesticide-free
24	virtuous	adj	/'vɜ:tʃuəs/	có hiệu quả tốt, lành mạnh	beneficial, advantageous, good
25	consultancy	n	/kən'sʌltənsi/	công ty/dịch vụ tư vấn	advisory firm, consulting agency

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Urban agriculture	Nông nghiệp đô thị
2	Soil-free approach	Phương pháp trồng không cần đất
3	Aeroponic growing tower	Tháp trồng trọt khí canh
4	Sustainable development	Phát triển bền vững
5	Practical constraint	Hạn chế thực tế
6	Intensive farming	Quảng canh / Thâm canh nông nghiệp
7	Closed circuit	Chu trình khép kín
8	Recycled water	Nước được tái chế
9	Disused shipping container	Thùng công-ten-nơ bỏ hoang
10	Real-life showcase	Mô hình trình diễn thực tế

11	Organic nutrient	Dinh dưỡng hữu cơ
12	Food production	Sản xuất thực phẩm

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Modern city projects often utilize an innovative _____ to cultivate fresh produce on rooftops.

- A. urban agriculture
- B. disused shipping container
- C. closed circuit
- D. practical constraint

Question 2: Vertical farming systems rely heavily on a specialized _____ that suspends plant roots in mid-air.

- A. practical constraint
- B. aeroponic growing tower
- C. real-life showcase
- D. recycled water

Question 3: Developers must account for every spatial and structural _____ when designing high-rise farms.

- A. urban agriculture
- B. disused shipping container
- C. practical constraint
- D. food production

Question 4: The new rooftop installation serves as an impressive _____ for ecological technology.

- A. real-life showcase
- B. organic nutrient
- C. closed circuit
- D. intensive farming

Question 5: Liquid nutrients circulate continuously through a piped _____ to feed growing crops.

- A. sustainable development
- B. closed circuit
- C. practical constraint
- D. aeroponic growing tower

Exercise 2: Choose the correct collocation.

Question 6: Traditional methods of _____ generate substantial greenhouse gas emissions due to heavy machinery.

- A. real-life showcase
- B. intensive farming
- C. practical constraint
- D. disused shipping container

Question 7: Advanced aeroponic towers require only a small amount of _____ that is constantly filtered and reused.

- A. urban agriculture
- B. closed circuit
- C. recycled water
- D. organic nutrient

Question 8: Entrepreneurs in modern cities have converted an old _____ into an indoor strawberry farm.

- A. disused shipping container
- B. real-life showcase
- C. sustainable development
- D. practical constraint

Question 9: Plants in aeroponic systems absorb liquid _____ directly through their dangling root systems.

- A. food production B. practical constraint
C. closed circuit D. organic nutrient

Question 10: Bringing _____ closer to urban populations drastically reduces transport distances and refrigeration costs.

- A. aeroponic growing tower B. food production
C. recycled water D. disused shipping container

Exercise 3: Complete the sentences

Question 11: The company established a flourishing _____ to advise global clients on high-tech farming techniques.

- A. aubergine B. fraction C. consultancy D. punnet

Question 12: Fruits chosen for long-distance transport must be hardy enough to _____ weeks of travel.

- A. withstand B. dangle C. exhaustion D. target

Question 13: Heavy agricultural techniques often leave topsoil completely _____ of essential minerals over time.

- A. disused B. exhausted C. virtuous D. intensive

Question 14: Aeroponic technology consumes only a tiny _____ of the electricity used by conventional indoor lighting farms.

- A. pitch B. pesticide C. generator D. fraction

Question 15: Farmers who practice soil-free cultivation can easily avoid using synthetic chemical _____ on their crops.

- A. pesticides B. wholesalers C. constraints D. enquiries

Exercise 4: Choose the best answer.

Question 16: The word **flourishing** in the passage is closest in meaning to:

- A. declining B. failing C. thriving D. struggling

Question 17: The word **exhausted** in the passage is closest in meaning to:

- A. enriched B. depleted C. flooded D. expanded

Question 18: The word **withstand** in the passage is closest in meaning to:

- A. resist B. surrender C. break D. collapse

Question 19: The word **disused** in the passage is closest in meaning to:

- A. modern B. abandoned C. crowded D. busy

Question 20: The word **virtuous** in the passage is closest in meaning to:

- A. harmful B. costly C. beneficial D. complex

Forest Management in Pennsylvania, USA

Topic: Ecology • Bioenergy • Resource Conservation

PART 1. VOCABULARY

STT	Vocabulary	POS	IPA	Meaning	Synonyms
1	timber	n	/ˈtɪmbə(r)/	gỗ xây dựng, gỗ xẻ	lumber, wood
2	high-grading	n	/haɪ ˈɡreɪdɪŋ/	phương pháp chặt cây ngon chọn lọc	selective logging of best trees
3	legacy	n	/ˈlegəsi/	di sản, hậu quả kéo dài	heritage, residue, footprint
4	abundant	adj	/əˈbʌndənt/	dồi dào, nhiều	plentiful, copious, ample
5	regeneration	n	/rɪˌdʒenəˈreɪʃn/	sự tái sinh, mọc lại	renewal, rebirth, regrowth
6	stand	n	/stænd/	quần thể cây cùng loại	forest patch, tree group
7	vulnerable	adj	/ˈvʌlnərəbl/	dễ bị tổn thương	susceptible, exposed, weak
8	combustion	n	/kəmˈbʌstʃən/	sự đốt cháy	burning, ignition
9	gasify	v	/ˈɡæsɪfaɪ/	khí hóa	vaporize, turn to gas
10	foliage	n	/ˈfəʊliɪdʒ/	tán lá, lá cây nói chung	leaves, greenery, vegetation
11	crown	n	/kraʊn/	ngọn cây, tán trên	tree top, canopy
12	coverage	n	/ˈkʌvərɪdʒ/	sự che phủ	shelter, canopy, protection
13	tailor	v	/ˈteɪlə(r)/	thiết kế theo yêu cầu, tùy chỉnh	customize, adapt, adjust
14	salvage	v/n	/ˈsælvaɪdʒ/	thu gom, cứu hộ (cây hỏng/chết)	rescue, recover, retrieve

15	pathogen	n	/ˈpæθədʒən/	mầm bệnh, tác nhân gây bệnh	disease agent, germ, virus
16	vigorous	adj	/ˈvɪɡərəs/	khỏe mạnh, phát triển mạnh mẽ	robust, healthy, strong
17	outbreak	n	/ˈaʊtbreɪk/	sự bùng phát	eruption, surge, flare-up
18	seedling	n	/ˈsiːdlɪŋ/	cây con, mầm cây	sprout, sapling, young plant
19	tier	n	/tɪə(r)/	tầng, lớp	layer, level, stratum
20	retention	n	/rɪˈtenʃn/	sự giữ lại, duy trì	preservation, keeping, holding
21	cavity	n	/ˈkævəti/	hốc cây, lỗ hổng	hollow, hole, opening
22	resilience	n	/rɪˈzɪliəns/	khả năng phục hồi	toughness, elasticity, durability
23	diversity	n	/daɪˈvɜːsəti/	sự đa dạng	variety, range, multiplicity
24	pest	n	/pest/	sâu bệnh, côn trùng phá hại	parasite, insect plague
25	stem	n	/stem/	thân cây	trunk, stalk, main axis

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Low-use wood	Gỗ giá trị thấp / gỗ ít công dụng
2	Forest management	Quản lý rừng
3	Sustainable forestry	Lâm nghiệp bền vững
4	Wildlife habitat	Môi trường sống của động vật hoang dã
5	Timber market	Thị trường gỗ
6	Wood energy market	Thị trường năng lượng từ gỗ
7	Timber stand improvement	Cải thiện quần thể cây trồng gỗ
8	Salvage cut	Chặt thu gom (cây bệnh/chết)

9	Shelterwood cut	Chặt tạo tán bảo vệ cây con
10	Structural diversity	Sự đa dạng về cấu trúc
11	Rare species	Các loài quý hiếm
12	Fire prevention	Phòng chống cháy rừng

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Managing low-quality timber by selling it to the _____ incentivizes landowners to keep their woodlands healthy.

- A. wood energy market B. rare species C. salvage cut D. structural diversity

Question 2: Selective clearing designed to leave healthy trees with room to grow is formally called a _____.

- A. fire prevention B. timber stand improvement
C. timber market D. low-use wood

Question 3: Forester operations often require a _____ to remove sick or infested trees before diseases spread further.

- A. rare species B. structural diversity C. salvage cut D. timber market

Question 4: Leaving dead trees with natural holes creates a crucial _____ for woodpeckers and small forest mammals.

- A. timber market B. shelterwood cut C. fire prevention D. wildlife habitat

Question 5: Leaving a variety of tree ages and types standing preserves the overall _____ of the woodland ecosystem.

- A. structural diversity B. low-use wood
C. salvage cut D. wood energy market

Exercise 2: Choose the correct collocation.

Question 6: High-grading practice in the past left an overabundance of _____ across local ecosystems.

- A. rare species B. low-use wood
C. salvage cut D. timber stand improvement

Question 7: A progressive _____ involves harvesting mature trees gradually while letting young saplings establish underneath.

- A. wood energy market B. fire prevention
C. shelterwood cut D. structural diversity

Question 8: Dense undergrowth and dead branches are regularly cleared as part of essential _____ measures.

- A. fire prevention B. wildlife habitat C. low-use wood D. timber market

Question 9: Landowners who harvest high-value trunks primarily focus on making profits in the commercial _____.

- A. rare species B. timber stand improvement

C. salvage cut D. timber market

Question 10: Foresters must ensure that protected _____ remain undisturbed to prevent environmental degradation.

A. wood energy market B. rare species
C. shelterwood cut D. fire prevention

Exercise 3: Complete the sentences.

Question 11: Landowners who cut only the best trees leave behind a legacy of overcrowded, poor-quality _____.

A. stands B. pathogens C. foliage D. seedlings

Question 12: Modern forestry techniques are designed to _____ cutting strategies according to a landowner's specific ecological goals.

A. gasify B. tailor C. combustion D. salvage

Question 13: Forest health can be compromised when invasive pests cause a severe disease _____ in vulnerable areas.

A. retention B. outbreak C. cavity D. tier

Question 14: Tree branches left on the ground decay over time, ensuring the _____ of essential organic nutrients in the soil.

A. foliage B. crown C. stem D. retention

Question 15: Leaving hollow trees intact provides nest cavities that help boost the overall _____ of the forest against pest infestations.

A. resilience B. combustion C. legacy D. coverage

Exercise 4: Choose the best answer.

Question 16: The word **abundant** in the passage is closest in meaning to:

A. scarce B. rare C. plentiful D. hidden

Question 17: The word **vulnerable** in the passage is closest in meaning to:

A. protected B. susceptible C. strong D. resistant

Question 18: The word **vigorous** in the passage is closest in meaning to:

A. robust B. weak C. dying D. small

Question 19: The word **tailor** in the passage is closest in meaning to:

A. ignore B. customize C. destroy D. copy

Question 20: The word **resilience** in the passage is closest in meaning to:

A. toughness B. fragility C. decline D. infection

25	debris	n	/ˈdeɪbriː/	mảnh vỡ, rác thải vũ trụ	rubbish, remains, waste

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Low Earth orbit	Quỹ đạo tầm thấp của Trái Đất
2	Space debris	Rác thải vũ trụ
3	Traffic risk	Rủi ro giao thông
4	Runaway cascade	Chuỗi phản ứng bùng nổ mất kiểm soát
5	Space sustainability	Sự bền vững của không gian vũ trụ
6	Space traffic management	Quản lý giao thông không gian
7	High degree of precision	Độ chính xác ở mức độ cao
8	Potential collision	Nguy cơ va chạm tiềm ẩn

9	Authoritative catalogue	Danh mục chính thức, đáng tin cậy
10	Tragedy of the commons	Bi kịch của cái chung
11	Satellite constellation	Mạng lưới / chùm vệ tinh
12	Point of no return	Điểm không thể quay đầu lại

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: The proliferation of non-operational hardware in _____ creates dangerous hazards for ongoing spatial missions.

- A. space debris B. point of no return
C. space traffic management D. high degree of precision

Question 2: Scientists warn that a single major crash could trigger an unstoppable _____ of orbiting fragments.

- A. point of no return B. runaway cascade
C. authoritative catalogue D. space sustainability

Question 3: Establishing global guidelines for _____ ensures that future generations can continue launching commercial satellites safely.

- A. satellite constellation B. potential collision
C. space sustainability D. traffic risk

Question 4: Engineers must track every orbital path with a _____ to calculate collision risks accurately.

- A. high degree of precision B. tragedy of the commons
C. traffic risk D. space debris

Question 5: Without proper international regulation, near-Earth orbit faces an inevitable _____ driven by space pollution.

- A. point of no return B. satellite constellation
C. tragedy of the commons D. runaway cascade

Exercise 2: Choose the correct collocation.

Question 6: Most commercial communication systems operate within _____, making that area extremely congested.

- A. space sustainability B. low Earth orbit
C. tragedy of the commons D. authoritative catalogue

Question 7: Tech companies plan to deploy a massive _____ containing thousands of tiny internet-broadcasting units.

- A. runaway cascade B. high degree of precision
C. satellite constellation D. traffic risk

Question 8: Experts in _____ draw direct parallels between handling crowded flight paths at airports and tracking orbiting hardware.

- A. space traffic management B. potential collision
C. space debris D. low Earth orbit

Question 9: Operators were forced to fire thrusters to redirect the active craft away from an impending _____.

- A. point of no return B. space sustainability
C. tragedy of the commons D. potential collision

Question 10: Discrepancies between global databases demonstrate the current lack of a single _____ listing all active items.

- A. satellite constellation B. authoritative catalogue C. low Earth orbit D. runaway cascade

Exercise 3: Complete the sentences.

Question 11: Unused fuel left in dormant rocket stages can expand, explode, and cause the craft to _____ into thousands of pieces.

- A. designate B. vent C. disintegrate D. devolve

Question 12: Knowing the precise coordinates of space junk helps _____ the need for unnecessary and expensive avoidance maneuvers.

- A. cross-correlate B. alleviate C. choreograph D. designate

Question 13: Commercial operators are urged to act as responsible _____ by safely de-orbiting their equipment at mission completion.

- A. taxonomies B. stewards C. shrapnels D. constellations

Question 14: Researchers must _____ tracking entries from different government sources to resolve discrepancies in orbital paths.

- A. disintegrate B. vent C. devolve D. cross-correlate

Question 15: Spaceflight experts are creating precise _____ based on size and shape to categorize potential orbital hazards effectively.

- A. taxonomies B. manoeuvres C. stewardships D. precision

Exercise 4: Choose the best answer.

Question 16: The word **disintegrate** in the passage is closest in meaning to:

- A. assemble B. freeze C. break up D. expand

Question 17: The word **alleviate** in the passage is closest in meaning to:

- A. worsen B. ease C. ignore D. duplicate

Question 18: The word **precision** in the passage is closest in meaning to:

- A. accuracy B. speed C. uncertainty D. delay

Question 19: The word **authoritative** in the passage is closest in meaning to:

- A. unofficial B. doubtful C. unreliable D. definitive

Question 20: The word **devolve** in the passage is closest in meaning to:

- A. improve B. deteriorate C. remain D. advance

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Radiocarbon dating	Phương pháp đo tuổi bằng carbon phóng xạ
2	Burial ground	Nơi an táng cổ đại
3	Prehistoric monument	Công trình tiền sử
4	Dense cloud cover	Lớp mây che phủ dày đặc

5	Modern druid	Tu sĩ Celtic thời hiện đại
6	Curative power	Khả năng chữa bệnh
7	Indigenous agrarian	Người nông dân bản địa
8	General consensus	Sự đồng thuận chung
9	Megalithic stone	Khối đá cự thạch
10	Geological force	Lực địa chất
11	Astrological phenomenon	Hiện tượng thiên văn
12	Summer solstice	Ngày Hạ chí

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Stonehenge stands today as one of the most remarkable examples of an ancient _____.

- A. prehistoric monument B. general consensus
C. dense cloud cover D. modern druid

Question 2: Archaeologists verified the approximate age of organic remains found at the site by utilizing _____.

- A. curative power B. radiocarbon dating
C. summer solstice D. astrological phenomenon

Question 3: Human skeletons unearthed beneath the circular ditch suggest that the location initially functioned as a _____.

- A. prehistoric monument B. dense cloud cover
C. burial ground D. general consensus

Question 4: Every June, crowds including members of a _____ assemble near the standing rocks to welcome the morning sunrise.

- A. modern druid B. geological force C. curative power D. indigenous agrarian

Question 5: Scholars reach a broad _____ regarding the multi-phased nature of the monument's historical construction.

- A. summer solstice B. general consensus
C. prehistoric monument D. radiocarbon dating

Exercise 2: Choose the correct collocation.

Question 6: Critics argued that celestial observations were impractical in southern England due to frequent _____.

- A. curative power B. dense cloud cover
C. general consensus D. megalithic stone

Question 7: Recent hypotheses suggest pilgrims traveled great distances because the foreign bluestones were believed to possess a _____.

- A. prehistoric monument B. summer solstice
C. curative power D. modern druid

Question 8: The massive upright structures assembled in the central layout represent a classic example of a _____.

- A. megalithic stone B. geological force
C. dense cloud cover D. general consensus

Question 9: Early stages of ditch digging were carried out by an _____ population native to the British Isles.

- A. astrological phenomenon B. radiocarbon dating
C. burial ground D. indigenous agrarian

Question 10: Some researchers argued that ancient movement of heavy rocks across vast distances was driven by a _____.

- A. prehistoric monument B. geological force
C. modern druid D. dense cloud cover

Exercise 3: Complete the sentences

Question 11: Mainstream historians remained highly _____ about claims that natural ice flows deposited the bluestones neatly in a ring.

- A. iconic B. grooved C. sceptical D. megalithic

Question 12: Workers used primitive wooden rollers and sledges to _____ four-ton boulders across miles of rough terrain.

- A. haul B. speculate C. obscure D. consensus

Question 13: Overlying mist and heavy cloud cover can completely _____ atmospheric views of sunrise alignments during winter months.

- A. sarsen B. obscure C. haul D. speculate

Question 14: Unearthing carved tools and domestic bone _____ provided vital evidence regarding the identity of ancient builders.

- A. solstices B. glaciers C. rafts D. artifacts

Question 15: Medical researchers _____ that injured pilgrims visited the monument in hopes of receiving miraculous physical healing.

- A. speculated B. hauled C. obscured D. dated

Exercise 4: Choose the best answer.

Question 16: The word **sceptical** in the passage is closest in meaning to:

- A. certain B. enthusiastic C. doubtful D. trusting

Question 17: The word **obscure** in the passage is closest in meaning to:

- A. illuminate B. hide C. reveal D. clarify

Question 18: The word **haul** in the passage is closest in meaning to:

1	Artificial General Intelligence	Trí tuệ nhân tạo tổng hợp
2	Moral high ground	Chuẩn mực đạo đức cao
3	Physical constraint	Hạn chế về mặt vật lý
4	Disastrous consequence	Hậu quả thảm khốc
5	Human autonomy	Quyền tự chủ của con người
6	Utopian vision	Viễn cảnh không tưởng
7	Ethical silicon police	Cảnh sát đạo đức bằng phần mềm/vi mạch

8	Human capacity	Năng lực của con người
9	Safe co-existence	Sự cùng tồn tại an toàn
10	Moral reasoning	Lý luận đạo đức
11	Fallible nature	Bản chất dễ mắc sai lầm
12	Strategic alignment	Sự định hướng chiến lược

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: The long-term objective of computer scientists is to build an advanced system capable of _____ across all cognitive domains.

- A. Artificial General Intelligence B. Ethical silicon police
C. Physical constraint D. Disastrous consequence

Question 2: Misaligning AI objectives with human interests could trigger a series of unforeseen and _____.

- A. human autonomy B. disastrous consequences
C. moral high ground D. safe co-existence

Question 3: Biological brains face an inherent _____ regarding processing speed and storage size compared to machine hardware.

- A. physical constraint B. utopian vision
C. ethical silicon police D. moral reasoning

Question 4: Critics warn that handing decision-making powers to automated gatekeepers might severely erode _____.

- A. physical constraint B. utopian vision
C. human autonomy D. disastrous consequence

Question 5: Ensuring a peaceful and beneficial future requires establishing a reliable framework for _____ between humans and AI.

- A. ethical silicon police B. fallible nature
C. moral high ground D. safe co-existence

Exercise 2: Choose the correct collocation.

Question 6: Some philosophers dream of a perfect future guided by algorithms, but critics dismiss this ideal as a mere _____.

- A. disastrous consequence B. utopian vision
C. human capacity D. physical constraint

Question 7: Society must decide whether it wants automated monitoring algorithms functioning as an invisible _____.

- A. human autonomy B. safe co-existence
C. ethical silicon police D. moral reasoning

Question 8: Superintelligent systems must be designed to consistently pursue the _____ rather than reflecting human moral lapses.

- A. moral high ground B. physical constraint
C. utopian vision D. disastrous consequence

Question 9: AI models without ethical boundaries risk simply amplifying the darker sides of our inherently _____.

- A. human autonomy B. fallible nature
C. safe co-existence D. ethical silicon police

Question 10: Both high-level decision-making and nuanced _____ are traits historically believed to belong exclusively to human thinkers.

- A. physical constraint B. utopian vision
C. disastrous consequence D. moral reasoning

Exercise 3: Complete the sentences

Question 11: Future AI systems need to have their goals specifically targeted to _____ perfectly with human moral values.

- A. amplify B. deprive C. align D. specify

Question 12: Giving machines total administrative authority over public resources could ultimately _____ human professionals of their control.

- A. deprive B. align C. discriminate D. amplify

Question 13: Highly capable systems might be used improperly, thereby causing them to _____ existing societal biases and flaws.

- A. specify B. amplify C. align D. deprive

Question 14: Society must explicitly _____ the ethical guidelines that algorithms must follow before deployment.

- A. align B. deprive C. amplify D. specify

Question 15: Leaving critical societal choices to unguided algorithms risks allowing automated systems to unlawfully _____ against minority groups.

- A. discriminate B. align C. specify D. amplify

Exercise 4: Choose the best answer.

Question 16: The word **prodigious** in the passage is closest in meaning to:

- A. tiny B. ordinary C. extraordinary D. dangerous

Question 17: The word **fallible** in the passage is closest in meaning to:

- A. perfect B. error-prone C. logical D. invincible

Question 18: The word **deprive** in the passage is closest in meaning to:

- A. strip B. grant C. assist D. award

Question 19: The word **autonomy** in the passage is closest in meaning to:

- A. dependence B. self-rule C. subjection D. obedience

Question 20: The word **amplify** in the passage is closest in meaning to:

- A. reduce B. quiet C. intensify D. suppress

STT	Collocation	Meaning
1	Academic discipline	Ngành học / Lĩnh vực nghiên cứu
2	Urban planning	Quy hoạch đô thị
3	Humanist sensibility	Tư tưởng / Cảm quan nhân văn
4	Hydraulic plant	Hệ thống thủy lực

5	Modernist movement	Phong trào hiện đại
6	Climate crisis	Khủng hoảng khí hậu
7	Compact city	Đô thị nén / mật độ cao
8	Transport infrastructure	Cơ sở hạ tầng giao thông
9	Multi-level city	Đô thị nhiều tầng
10	Excessive cost	Chi phí quá cao
11	Global crisis	Khủng hoảng toàn cầu
12	Sustainable model	Mô hình phát triển bền vững

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: The 15th century marked the formal emergence of city design as a recognized _____.

- A. academic discipline B. climate crisis
C. hydraulic plant D. transport infrastructure

Question 2: Leonardo da Vinci envisioned an innovative _____ with separated functional layers for living and logistics.

- A. excessive cost B. multi-level city C. global crisis D. humanist sensibility

Question 3: Modern environmentalists advocate for the creation of a _____ to reduce land expansion and energy waste.

- A. transport infrastructure B. compact city C. multi-level city D. climate crisis

Question 4: Due to the projected _____ of the ambitious construction project, the ideal city blueprints remained unfulfilled during his lifetime.

- A. academic discipline B. humanist sensibility
C. excessive cost D. hydraulic plant

Question 5: Modern cities require a resilient and efficient _____ to handle heavy logistics and passenger flows smoothly.

- A. climate crisis B. transport infrastructure C. global crisis D. multi-level city

Exercise 2: Choose the correct collocation.

Question 6: The black death epidemic in 14th-century Europe stands out as a devastating _____.

- A. academic discipline B. hydraulic plant
C. transport infrastructure D. global crisis

Question 7: Present-day planners turn to ancient blueprints to build a truly _____ capable of enduring global warming.

- A. multi-level city B. excessive cost
C. sustainable model D. humanist sensibility

Question 8: To manage water flow and facilitate canal transportation, Leonardo designed an elaborate _____.

A. hydraulic plant B. academic discipline C. climate crisis D. compact city

Question 9: Global temperatures continue to rise rapidly, bringing the world to the brink of an unprecedented _____.

A. transport infrastructure B. climate crisis C. global crisis D. excessive cost

Question 10: Renaissance thinkers combined scientific rigour with a deep _____ to transform living conditions in medieval towns.

A. multi-level city B. sustainable model
C. academic discipline D. humanist sensibility

Exercise 3: Complete the sentences

Question 11: The grand architect aimed to create a completely _____ city layout with wide, orderly streets matching house heights.

A. adjacent B. unconventional C. rational D. prominent

Question 12: To reduce the spread of pestilence, street widths were designed to match the height of _____ buildings to let in sunlight.

A. prominent B. adjacent C. hydraulic D. compact

Question 13: Placing service transport underground and public walkways on upper levels was considered highly _____ during the 15th century.

A. unconventional B. prominent C. rational D. adjacent

Question 14: Modern urbanists frequently praise the seamless _____ of architectural beauty and structural engineering in Da Vinci's sketches.

A. basin B. boulevard C. rigour D. fusion

Question 15: Haussmann's famous 19th-century renovation of Paris included the formal _____ of urban areas by functional zones.

A. subdivision B. battlements C. pestilence D. catastrophe

Exercise 4: Choose the best answer.

Question 16: The word **adjacent** in the passage is closest in meaning to:

A. distant B. separate C. adjoining D. foreign

Question 17: The word **unconventional** in the passage is closest in meaning to:

A. standard B. unusual C. formal D. traditional

Question 18: The word **fusion** in the passage is closest in meaning to:

A. breakdown B. separation C. conflict D. blend

Question 19: The word **prominent** in the passage is closest in meaning to:

A. hidden B. distinguished C. minor D. unknown

1	Global warming	Sự nóng lên toàn cầu
2	Thermal expansion	Sự giãn nở vì nhiệt
3	Cross-laminated timber	Gỗ dán chéo kỹ thuật
4	Coal-burning power plant	Nhà máy nhiệt điện đốt than
5	Industrial byproduct	Phụ phẩm công nghiệp
6	Entire life cycle	Toàn bộ vòng đời

7	Carbon reduction	Giảm phát thải carbon
8	Cost-effective alternative	Giải pháp thay thế tiết kiệm chi phí
9	Greenhouse gas emissions	Khí thải nhà kính
10	Sustainable building material	Vật liệu xây dựng bền vững
11	Sheer scale	Quy mô cực kỳ lớn
12	Raw-material shortage	Sự thiếu hụt nguyên liệu thô

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Continuous usage of conventional cement in expanding cities threatens to drastically exacerbate _____.

- A. coal-burning power plant B. global warming
C. cross-laminated timber D. raw-material shortage

Question 2: Concrete and steel function exceptionally well together because they exhibit almost identical properties of _____.

- A. industrial byproduct B. cost-effective alternative
C. thermal expansion D. carbon reduction

Question 3: Modern wooden high-rises are frequently built using engineered blocks of _____.

- A. sheer scale B. greenhouse gas emissions
C. raw-material shortage D. cross-laminated timber

Question 4: Fly ash utilized in green concrete mixtures is primarily collected from a local _____.

- A. thermal expansion B. global warming
C. carbon reduction D. coal-burning power plant

Question 5: Incorporating industrial waste like slag into cement mixtures provides a useful _____ for construction firms.

- A. industrial byproduct B. cross-laminated timber
C. cost-effective alternative D. entire life cycle

Exercise 2: Choose the correct collocation.

Question 6: Calculating environmental impacts requires auditors to evaluate energy consumption across a structure's _____.

- A. sheer scale B. entire life cycle
C. thermal expansion D. raw-material shortage

Question 7: Long-distance transportation of substitute ingredients can undermine overall efforts toward meaningful _____.

- A. global warming B. coal-burning power plant
C. carbon reduction D. cross-laminated timber

Question 8: Cement manufacturing remains a primary contributor to global output of hazardous _____.

- A. greenhouse gas emissions B. cost-effective alternative

C. sustainable building material D. industrial byproduct

Question 9: Eco-friendly architects actively search for a reliable _____ to replace high-polluting Portland cement.

A. thermal expansion B. entire life cycle
C. sheer scale D. sustainable building material

Question 10: Environmental issues related to concrete stem less from its composition and more from the _____ of its global production.

A. raw-material shortage B. sheer scale
C. cross-laminated timber D. global warming

Exercise 3: Complete the sentences

Question 11: Excessive reliance on fossil fuels during transportation will further _____ environmental issues rather than solve them.

A. set B. reinforce C. aggravate D. factor in

Question 12: Steel bars are regularly embedded into liquid concrete mixtures to _____ structural support against heavy stress.

A. aggravate B. reinforce C. set D. factor in

Question 13: Freshly poured cement requires adequate curing time before it can fully _____ and support heavy building loads.

A. aggravate B. reinforce C. set D. factor in

Question 14: Environmental analysts must _____ transportation emissions when evaluating the carbon footprint of green materials.

A. aggravate B. reinforce C. set D. factor in

Question 15: Natural timber remains highly _____ to moisture damage and insect infestations if left untreated.

A. cost-effective B. pourable C. conventional D. susceptible

Exercise 4: Choose the best answer.

Question 16: The word **aggravate** in the passage is closest in meaning to:

A. improve B. reduce C. worsen D. ignore

Question 17: The word **susceptible** in the passage is closest in meaning to:

A. immune B. vulnerable C. resistant D. strong

Question 18: The word **durability** in the passage is closest in meaning to:

A. weakness B. cost C. sturdiness D. lightness

5	Eliminate the need for	Loại bỏ sự cần thiết của (không cần phải...)
6	Operating pressure	Áp suất hoạt động
7	Financial success	Thành công về mặt tài chính
8	Pass the emissions laws	Vượt qua các luật/quy định về khí thải
9	In good working condition	Trong trạng thái hoạt động tốt

10	Normal maintenance	Bảo trì / bảo dưỡng định kỳ thông thường
11	Eagerly await	Háo hức chờ đợi
12	Endlessly tinker with	Chỉnh sửa lặt vặt không ngừng nghỉ

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Early gasoline automobiles struggled initially, but the invention of the electric starter allowed them to achieve massive _____.

- A. internal combustion engine B. financial success
C. normal maintenance D. operating pressure

Question 2: The Doble brothers added a key-based ignition system to their vehicle to _____ manually lighting the boiler.

- A. seek investment B. pass the emissions laws
C. eliminate the need for D. draw the attention of

Question 3: Despite its heavy weight, the Model E demonstrated excellent road handling once the boiler reached its full _____.

- A. financial success B. internal combustion engine
C. normal maintenance D. operating pressure

Question 4: Thousands of customers were reported to _____ the delivery of their newly ordered steam vehicles in 1918.

- A. endlessly tinker with B. pass the emissions laws
C. eagerly await D. seek investment

Question 5: Even today, an unmodified Doble steam car can run clean enough to _____ in California.

- A. pass the emissions laws B. draw the attention of
C. eliminate the need for D. seek investment

Exercise 2: Choose the correct collocation.

Question 6: Abner Doble traveled all the way to Detroit in order to _____ for his new car manufacturing company.

- A. endlessly tinker with B. seek investment
C. pass the emissions laws D. eagerly await

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Alfred Wegener revolutionized geological thinking by proposing his pioneering theory of _____.

- A. continental drift B. professional contact
C. hot-air balloon D. scientific paper

Question 2: Modern geology considers modern crustal movement models to be a _____ of Wegener's original proposals.

- A. professional contact B. direct descendant
C. international controversy D. shift in interest

Question 3: Wegener's groundbreaking publication sparked an intense _____ among leading geologists worldwide.

- A. hot-air balloon B. atmospheric physics
C. international controversy D. accurate picture

Question 4: Biographers struggle to reconstruct an _____ of a historical scientist when very few personal journals survive.

- A. accurate picture B. international controversy
C. direct descendant D. continental drift

Question 5: Before devoting time to Earth sciences, Wegener gained acclaim by publishing a well-received _____.

- A. scientific paper B. continental drift C. hot-air balloon D. professional contact

Exercise 2: Choose the correct collocation.

Question 6: Modern Earth science principles rely heavily on the unifying theory of _____.

- A. atmospheric physics B. professional contact
C. international controversy D. plate tectonics

Question 7: Long before his polar expeditions, Wegener achieved notoriety by setting an endurance record in a _____.

- A. hot-air balloon B. direct descendant C. coherent narrative D. scientific paper

Question 8: Historians construct a _____ of a researcher's discoveries by carefully examining letters and daily laboratory logs.

- A. international controversy B. plate tectonics

C. coherent narrative D. professional contact

Question 9: Despite his monumental ideas, Wegener preferred working isolated in his study rather than networking through a _____.

A. continental drift B. professional contact
C. hot-air balloon D. direct descendant

Question 10: Early in his academic career, Wegener made notable contributions to meteorology and _____.

A. plate tectonics B. atmospheric physics
C. coherent narrative D. accurate picture

Exercise 3: Complete the sentences

Question 11: Wegener provided extensive geological evidence demonstrating that horizontal landmass movements were entirely _____.

A. plausible B. intriguing C. controversial D. coherent

Question 12: The initial public _____ to the theory of continental displacements was extremely hostile among conventional geologists.

A. context B. reception C. intention D. happenstance

Question 13: Exploring the life of a multifaceted researcher requires analyzing their major achievements within a broader historical _____.

A. context B. intention C. happenstance D. journal

Question 14: People often reflect back on unexpected life changes _____ to create a logical story of purposeful choices.

A. plausibly B. retroactively C. laterally D. retrospectively

Question 15: Biographers note that major scientific discoveries are often influenced by pure _____ rather than rigid long-term planning.

A. intention B. context C. happenstance D. reception

Exercise 4: Choose the best answer.

Question 16: The word **plausible** in the passage is closest in meaning to:

A. impossible B. absurd C. credible D. mysterious

Question 17: The word **intriguing** in the passage is closest in meaning to:

A. boring B. fascinating C. simple D. harmful

Question 18: The word **controversial** in the passage is closest in meaning to:

A. debatable B. accepted C. proven D. peaceful

Question 19: The word **coherent** in the passage is closest in meaning to:

A. disorganized B. confusing C. incomplete D. logical

Question 20: The word **retrospectively** in the passage is closest in meaning to:

A. in advance B. in hindsight C. simultaneously D. temporarily
