25	preference	n	/'prefrəns/	sự ưa thích, ưu tiên	inclination, liking, choice

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Synthetic string	Dây vợt nhân tạo
2	Competitive advantage	Lợi thế cạnh tranh
3	Performance maximisation	Tối đa hóa hiệu suất
4	Hybrid set-up	Cấu hình lai
5	String bed	Mặt lưới dây vợt
6	Court surface	Bề mặt sân thi đấu
7	Natural gut	Dây ruột tự nhiên
8	Climatic conditions	Điều kiện khí hậu
9	Dense string pattern	Mật độ dây đan dày

10	Racket specification	Thông số kỹ thuật của vợt
11	Customisation process	Quy trình tùy chỉnh
12	Lead weight	Miếng chì chèn trọng lượng

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Modern professional tennis players frequently rely on custom modifications to gain a critical _____.

A. competitive advantage B. string bed C. climatic condition D. natural gut

Question 2: Technicians carefully adjust frame weight and balance to achieve the highest level of _____.

A. court surface B. performance maximisation
C. lead weight D. hybrid set-up

Question 3: Elite athletes send their equipment to specialized laboratories to undergo a rigorous _____.

A. customisation process B. natural gut
C. climatic condition D. court surface

Question 4: Players who prefer extra control often choose a frame featuring a very _____.

A. hybrid set-up B. lead weight C. natural gut D. dense string pattern

Question 5: Before modern polymers were developed, high-end equipment relied exclusively on cords made of _____.

A. performance maximisation B. natural gut
C. competitive advantage D. lead weight

Exercise 2: Choose the correct collocation.

Question 6: Tennis stringers adjust string tension depending on whether the game is played on a slow or fast _____.

A. lead weight B. court surface
C. customisation process D. dense string pattern

Question 7: Combining stiff co-polyester with soft natural gut creates a highly versatile _____.

A. competitive advantage B. court surface C. hybrid set-up D. natural gut

Question 8: Legendary server Pete Sampras increased his shot power by attaching extra _____ onto his frame.

A. performance maximisation B. customisation process
C. dense string pattern D. lead weight

Question 9: Humidity and extreme heat represent challenging _____ that influence string tension choices.

A. climatic conditions B. natural gut C. hybrid set-up D. lead weight

Question 10: The introduction of co-polyester materials completely transformed the responsiveness of the _____.

- A. customisation process B. string bed
C. competitive advantage D. lead weight

Exercise 3: Complete the sentences

Question 11: Minor structural adjustments allow top-tier players to _____ their equipment for precise shot control.

- A. anticipate B. attribute C. supplant D. tweak

Question 12: Synthetic strings made of advanced co-polyesters prove to be far more _____ than traditional materials.

- A. dense B. climatic C. durable D. synthetic

Question 13: Great champions often have the heavy serving power of their game _____ to custom frame weights.

- A. anticipated B. attributed C. revolutionised D. tweaked

Question 14: Breakthroughs in equipment materials completely helped to _____ how modern baseliners hit with massive topspin.

- A. anticipate B. attribute C. tweak D. revolutionise

Question 15: Early tennis pioneers in the wooden racket era could hardly _____ the rapid technical evolutions of today.

- A. attribute B. tweak C. anticipate D. revolutionise

Exercise 4: Choose the best answer.

Question 16: The word **durable** in the passage is closest in meaning to:

- A. fragile B. cheap C. long-lasting D. heavy

Question 17: The word **anticipate** in the passage is closest in meaning to:

- A. ignore B. foresee C. prevent D. regret

Question 18: The word **tweak** in the passage is closest in meaning to:

- A. fine-tune B. destroy C. replace D. abandon

Question 19: The word **revolutionise** in the passage is closest in meaning to:

- A. preserve B. limit C. ruin D. transform

Question 20: The word **attributed** in the passage is closest in meaning to:

- A. denied B. credited C. removed D. forgotten

3	Threat response	Phản ứng đe dọa (tiêu cực)
4	Challenge state	Trạng thái thách thức (tích cực)
5	Physiological response	Phản ứng sinh lý cơ thể
6	Heart rate	Nhịp tim
7	Blood vessel	Mạch máu
8	Stress hormone	Hormone căng thẳng

9	Negative stress response	Phản ứng căng thẳng tiêu cực
10	Competitive pressure	Áp lực thi đấu
11	Mental imagery	Sự hình dung / Tưởng tượng trong đầu
12	Muscle tremor	Sự run cơ / Trầm cơ

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Athletes competing in major world championships must constantly manage intense _____.

- A. psychological pressure B. blood vessel
C. mental imagery D. muscle tremor

Question 2: Maintaining adequate mental resources during high-stakes games allows players to enter a beneficial _____.

- A. threat response B. challenge state
C. stress hormone D. negative stress response

Question 3: When perceived demands outweigh personal coping mechanisms, an individual typically triggers a _____.

- A. mental imagery B. competitive pressure
C. threat response D. psychological pressure

Question 4: Adrenaline release expands each vital _____ to increase blood flow toward the brain and muscles.

- A. challenge state B. mental imagery
C. psychological pressure D. blood vessel

Question 5: High levels of cortisol act as a harmful _____ that restricts arterial widening during critical events.

- A. challenge state B. competitive pressure
C. stress hormone D. mental imagery

Exercise 2: Choose the correct collocation.

Question 6: Athletes who view competitive stress as an exciting opportunity consistently achieve _____.

- A. muscle tremor B. superior performance
C. threat response D. psychological pressure

Question 7: High anxiety levels often manifest through uncomfortable physical symptoms like an elevated _____.

- A. challenge state B. mental imagery C. heart rate D. threat response

Question 8: Experiencing repeated instances of a _____ can elevate long-term health risks like heart disease.

- A. psychological pressure B. superior performance
C. blood vessel D. negative stress response

Question 9: Sports psychologists train players in _____ techniques to rehearse winning plays mentally.

A. mental imagery B. threat response C. blood vessel D. stress hormone

Question 10: Simulated training drills help young players adapt effectively to real-world _____.

A. muscle tremor B. competitive pressure C. challenge state D. heart rate

Exercise 3: Complete the sentences

Question 11: During high-pressure tournaments, tennis players often struggle to _____ their breathing and heart rate.

A. recreate B. accumulate C. dictate D. regulate

Question 12: Severe anxiety can _____ the beneficial cardiovascular effects produced by natural adrenaline.

A. cope B. inhibit C. recreate D. accumulate

Question 13: Coaches design challenging practice drills against peer opponents to _____ actual tournament conditions.

A. cope B. regulate C. recreate D. dictate

Question 14: How well an athlete manages stress will largely _____ whether they experience a positive or negative response.

A. accumulate B. regulate C. recreate D. dictate

Question 15: Experiencing severe physical symptoms like muscle _____ can severely impair an athlete's fine motor control.

A. intensity B. episode C. tremor D. peer

Exercise 4: Choose the best answer.

Question 16: The word **inhibit** in the passage is closest in meaning to:

A. encourage B. assist C. suppress D. trigger

Question 17: The word **regulate** in the passage is closest in meaning to:

A. ignore B. control C. worsen D. release

Question 18: The word **superior** in the passage is closest in meaning to:

A. exceptional B. average C. terrible D. ordinary

Question 19: The word **dictate** in the passage is closest in meaning to:

A. follow B. guess C. hide D. determine

5	Strong work ethic	Đạo đức / Tinh thần làm việc nghiêm túc
6	Disadvantaged area	Khu vực khó khăn / Thiếu điều kiện
7	Extended family	Đại gia đình / Gia đình mở rộng
8	High performer	Người đạt thành tích xuất sắc
9	Single parent	Bố/Mẹ đơn thân

10	Specific sphere	Lĩnh vực cụ thể
11	Tested intelligence	Trí thông minh qua kiểm tra / Chỉ số IQ
12	Educational psychologist	Nhà tâm lý học giáo dục

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Achieving exceptional levels of mastery requires structured, long-term commitment to continuous _____.

- A. disadvantaged area B. single parent
C. deliberate practice D. extended family

Question 2: Emerging neuroscience confirms that target activities create new _____ in the brain regardless of age.

- A. tested intelligence B. neural pathways
C. single parent D. extended family

Question 3: Accomplished individuals who overcome socioeconomic hurdles frequently credit their parents for instilling a _____.

- A. single parent B. disadvantaged area
C. strong work ethic D. tested intelligence

Question 4: Many famous historical geniuses were considered entirely _____ during their early childhood years.

- A. single parent B. extended family C. tested intelligence D. high performers

Question 5: Modern research indicates that top achievements extend far beyond measures of simple _____.

- A. tested intelligence B. disadvantaged area
C. single parent D. extended family

Exercise 2: Choose the correct collocation.

Question 6: Studies evaluating successful children from poor backgrounds emphasize the importance of supportive adults in their _____.

- A. tested intelligence B. disadvantaged area
C. single parent D. extended family

Question 7: Cognitive psychologists suggest that exceptional achievements rely much less on _____ than previously believed.

- A. single parent B. disadvantaged area
C. innate talent D. tested intelligence

Question 8: Growing up in a heavily _____ does not automatically prevent a child from attaining remarkable academic success.

- A. single parent B. extended family
C. tested intelligence D. disadvantaged area

Question 9: A leading _____ discovered that random students trained in memory techniques could easily outperform naturally gifted peers.

- A. educational psychologist B. single parent
C. disadvantaged area D. extended family

Question 10: Cultivating key learning attitudes enables ordinary students to develop the attributes typical of a _____.

- A. single parent B. high performer C. disadvantaged area D. extended family

Exercise 3: Complete the sentences

Question 11: Albert Einstein remained completely _____ by early academic rejections, continuing his physics research relentlessly.

- A. unexceptional B. undeterred C. deliberate D. disadvantage

Question 12: Leading educational researchers demonstrate that high-performance learning behaviors are fully _____ and can be taught.

- A. unexceptional B. deliberate C. replicable D. disadvantage

Question 13: Fields Medal winner Maryam Mirzakhani proved to be remarkably _____ when facing complex mathematical setbacks.

- A. unexceptional B. resolute C. deliberate D. disadvantage

Question 14: Great achievements across any complex academic _____ depend heavily on personal character and sustained effort.

- A. unexceptional B. deliberate C. disadvantage D. discipline

Question 15: Trained students using structured techniques were able to _____ those believed to possess superior natural memories.

- A. unexceptional B. deliberate C. outperform D. disadvantage

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Early human groups used small islands as a strategic _____ while navigating vast ocean distances.

A. stepping stone B. volcanic glass C. clam shell D. historic trade

Question 2: Field researchers dug small test trenches to gather physical _____ confirming early human activity.

A. volcanic glass B. heavy-duty use
C. archaeological evidence D. migration route

Question 3: Excavations revealed ancient tools fashioned from sharp _____ due to the scarcity of local stone.

A. rock shelter B. migration route C. clam shell D. ice age

Question 4: Discovered obsidian artifacts made of high-quality _____ prove that island inhabitants engaged in seafaring trade.

A. stepping stone B. heavy-duty use C. historic trade D. volcanic glass

Question 5: Early populations adjusted their movement paths along an established _____ as sea levels shifted.

A. migration route B. rock shelter C. clam shell D. ice age

Exercise 2: Choose the correct collocation.

Question 6: Primitive tools crafted from tough stone were specifically ground for _____ in clearing dense jungle vegetation.

A. stepping stone B. heavy-duty use
C. archaeological evidence D. clam shell

Question 7: Caves located along the coastal cliffs functioned as a temporary _____ for early hunter-gatherers.

A. migration route B. volcanic glass C. rock shelter D. historic trade

Question 8: The earliest record of permanent _____ on the island dates back over eighteen thousand years.

A. archaeological evidence B. heavy-duty use
C. stepping stone D. human occupation

Question 9: Around eleven thousand years ago, the end of the last _____ brought warmer temperatures and denser forests.

A. ice age B. clam shell C. rock shelter D. volcanic glass

Question 10: Pottery fragments found in upper soil layers suggest later involvement in the regional _____.

- A. heavy-duty use B. historic trade C. migration route D. stepping stone

Exercise 3: Complete the sentences

Question 11: The team discovered ancient shell axe fragments during their excavation of a prehistoric _____.

- A. undergrowth B. pottery C. departure D. rock shelter

Question 12: Island residents were remarkably _____ at hunting in dense rainforests and foraging along coastal waters.

- A. heavy-duty B. adept C. impenetrable D. ocean-going

Question 13: The presence of non-native obsidian confirms that islanders were capable of _____ across open seas.

- A. rock shelter B. undergrowth C. voyaging D. departure

Question 14: Overgrown jungle vegetation eventually became so thick that stone tools were no longer an effective match for the _____.

- A. pottery B. fragment C. spice D. undergrowth

Question 15: Thousands of years after its initial abandonment, the cave site was finally _____ by spice traders.

- A. ground B. dispersed C. re-occupied D. encompassed

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Preserving tropical coastal ecosystems plays a pivotal role in promoting effective _____.

- A. over-extraction of water B. climate change mitigation
C. net carbon emitter D. waterlogged organic soil

Question 2: Coastal mangrove forests function as natural buffers against severe ocean storms and any sudden _____.

- A. long-term value B. extreme weather event
C. net carbon emitter D. landmass loss

Question 3: Draining pristine peat swamps turns natural carbon sinks into a major _____ that releases massive emissions.

- A. over-extraction of water B. long-term value
C. net carbon emitter D. climate change mitigation

Question 4: Environmental agencies work to protect ancient peat swamps because of their exceptionally _____.

- A. over-extraction of water B. net carbon emitter
C. long-term value D. high biodiversity value

Question 5: Agricultural runoff and commercial drainage projects are accelerating rapid _____ around the world.

- A. net carbon emitter B. extreme weather event
C. wetland degradation D. climate change mitigation

Exercise 2: Choose the correct collocation.

Question 6: Depleting underground aquifers for agricultural irrigation represents a dangerous _____ in dry regions.

- A. extreme weather event B. over-extraction of water
C. high biodiversity value D. net carbon emitter

Question 7: Progressive governments recognize that natural coastal buffers offer immense _____ compared to quick commercial profits.

- A. extreme weather event B. net carbon emitter
C. long-term value D. over-extraction of water

Question 8: Intact peat swamps retain immense volumes of carbon, functioning as a vital global _____.

- A. climate change mitigation B. extreme weather event
C. net carbon emitter D. carbon store

Question 9: Soil erosion combined with rising sea levels threatens to cause catastrophic _____ across low-lying coastal islands.

- A. landmass loss B. high biodiversity value
C. net carbon emitter D. climate change mitigation

Question 10: Sustainable development programs in rural communities prioritize green projects that support local _____.

- A. extreme weather event B. income generation
C. net carbon emitter D. over-extraction of water

Exercise 3: Complete the sentences

Question 11: Peatlands feature thick layers of deeply submerged _____ soil that trap massive amounts of ancient carbon.

- A. subtle B. seldom C. optimistic D. organic

Question 12: Draining tropical swamp forests causes gradual land _____ that eventually leaves vast coastal regions permanently underwater.

- A. clearance B. subsidence C. buffer D. commodity

Question 13: Environmental researchers note that subtle chemical pollution and invisible sediment run-off can be far more _____ than sudden industrial accidents.

- A. organic B. subtle C. damaging D. optimistic

Question 14: Planting dense tree canopies across coastal zones helps shade the ground and alter the local _____.

- A. clearance B. commodity C. subsidence D. microclimate

Question 15: Protecting global ecosystems requires clear regulations to control commercial timber _____ and land clearing.

- A. subsidence B. microclimate C. extraction D. clearance

Exercise 4: Choose the best answer.

Question 16: The word **subsidence** in the passage is closest in meaning to:

- A. expansion B. elevation C. sinking D. explosion

Question 17: The word **degradation** in the passage is closest in meaning to:

- A. restoration B. deterioration C. protection D. expansion

Question 18: The word **acknowledges** in the passage is closest in meaning to:

- A. recognizes B. denies C. ignores D. rejects

Question 19: The word **catastrophe** in the passage is closest in meaning to:

1	Artificial speech translation	Biến đổi / Dịch thuật tiếng nói nhân tạo
2	Speech recognition	Sự nhận diện giọng nói
3	Voice-controlled device	Thiết bị điều khiển bằng giọng nói
4	Professional application	Ứng dụng chuyên nghiệp
5	Shared language	Ngôn ngữ chung

6	Cultural norm	Quy chuẩn văn hóa
7	Lingua franca	Ngôn ngữ chung / Cầu nối ngôn ngữ
8	Voice-morphing technology	Công nghệ biến đổi giọng nói
9	Background noise	Tiếng ồn nền
10	Real-time translation	Dịch thuật thời gian thực / Trực tiếp
11	Language barrier	Rào cản ngôn ngữ
12	Social function	Chức năng xã hội

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Cutting-edge software platforms now feature automated _____ designed to interpret spoken words instantly across multiple dialects.

- A. artificial speech translation B. professional application
C. background noise D. lingua franca

Question 2: Engineers must continually refine algorithms to improve _____ under noisy public conditions.

- A. cultural norm B. speech recognition C. shared language D. social function

Question 3: Tech companies are heavily investing in expanding each modern _____ into household appliances.

- A. background noise B. shared language
C. voice-controlled device D. cultural norm

Question 4: Enterprise clients require specialized software built specifically for demanding _____.

- A. cultural norm B. background noise
C. shared language D. professional applications

Question 5: Immigrant families often struggle to maintain a strong _____ across different generations.

- A. voice-controlled device B. background noise
C. shared language D. artificial speech translation

Exercise 2: Choose the correct collocation.

Question 6: Software designers must ensure automated translators respect localized _____ during formal diplomatic exchanges.

- A. background noise B. cultural norms
C. professional applications D. shared language

Question 7: Throughout history, major commercial centers adopted a universal _____ to facilitate international trade.

- A. background noise B. professional application
C. lingua franca D. voice-controlled device

Question 8: Next-generation audio tools incorporate synthetic _____ to mimic the user's natural speaking tone.

- A. artificial speech translation B. cultural norm
C. background noise D. voice-morphing technology

Question 9: High levels of persistent _____ make it extremely difficult for automated earpieces to process conversation accurately.

- A. background noise B. shared language
C. professional application D. cultural norm

Question 10: Modern earpieces attempt to provide seamless _____ during international business conferences.

- A. cultural norm B. voice-controlled device
C. background noise D. real-time translation

Exercise 3: Complete the sentences

Question 11: Devices that once belonged strictly to science fiction have become completely _____ in modern homes.

- A. ubiquitous B. commonplace C. seamless D. noteworthy

Question 12: To improve customer satisfaction, tech startups actively work to _____ existing performance limitations in accuracy.

- A. preserve B. redress C. simulate D. diminish

Question 13: Developing fully automated global translation systems will inevitably _____ significant advances in artificial intelligence.

- A. preserve B. simulate C. entail D. diminish

Question 14: Earpiece translators will become far more effective once voice-controlled technology becomes truly _____.

- A. noteworthy B. commonplace C. seamless D. prevalent

Question 15: Broadcast channels require an audio translator that delivers continuous, _____ interpretation during live speeches.

- A. commonplace B. noteworthy C. simultaneous D. ubiquitous

Exercise 4: Choose the best answer.

Question 16: The word **commonplace** in the passage is closest in meaning to:

- A. rare B. expensive C. ordinary D. complex

Question 17: The word **redress** in the passage is closest in meaning to:

- A. worsen B. remedy C. hide D. praise

Question 18: The word **simultaneous** in the passage is closest in meaning to:

- A. concurrent B. delayed C. sequential D. irregular

Question 19: The word **ubiquitous** in the passage is closest in meaning to:

- A. hidden B. foreign C. rare D. omnipresent

Question 20: The word **diminish** in the passage is closest in meaning to:

- A. expand B. decrease C. increase D. strengthen

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Knock-on effect	Hiệu ứng dây chuyền / Hệ lụy kéo theo
2	Advance phenology	Diễn ra chu kỳ sinh học sớm hơn
3	Reproductive cycle	Chu kỳ sinh sản
4	Flexible lifecycle	Vòng đời linh hoạt
5	Single generation	Thế hệ đơn (chỉ sinh sản 1 lứa/năm)
6	Coppiced woodland	Rừng thưa cắt tỉa định kỳ

7	Limestone pavement	Địa hình nứt nẻ mặt đá vôi
8	Butterfly enthusiast	Người đam mê / Yêu thích bướm
9	Ecological ecosystem	Hệ sinh thái tự nhiên
10	Species abundance	Sự dồi dào / Số lượng loài
11	Geographic distribution	Sự phân bố địa lý
12	Warning sign	Dấu hiệu cảnh báo

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Unchecked declines in key pollinator populations create unpredictable _____ throughout the broader food web.

- A. butterfly enthusiasts B. limestone pavements
C. single generations D. knock-on effects

Question 2: Warmer spring temperatures cause many migratory insect species to _____ earlier than in historical decades.

- A. coppiced woodland B. advance phenology
C. warning sign D. reproductive cycle

Question 3: Insects equipped with a highly _____ can complete multiple breeding cycles within a single warm summer.

- A. single generation B. limestone pavement
C. flexible lifecycle D. warning sign

Question 4: Rare butterfly species that produce only a _____ each year struggle to recover from unseasonal climate disruptions.

- A. knock-on effect B. warning sign
C. butterfly enthusiast D. single generation

Question 5: Long-term survey projects rely heavily on observational data gathered by dedicated _____.

- A. butterfly enthusiasts B. knock-on effects
C. coppiced woodlands D. limestone pavements

Exercise 2: Choose the correct collocation.

Question 6: Preserving specialized habitats like a _____ is vital for protecting endangered woodland butterflies.

- A. knock-on effect B. flexible lifecycle
C. warning sign D. coppiced woodland

Question 7: Unique geological formations such as a _____ support highly specific microclimates necessary for rare caterpillars.

- A. single generation B. knock-on effect
C. limestone pavement D. butterfly enthusiast

Question 8: Multi-generational species complete an extra _____ when ambient temperatures remain warm into late autumn.

- A. Flexible lifecycle B. warning sign
C. knock-on effect D. reproductive cycle

Question 9: Field biologists monitor subtle drops in local _____ to identify vulnerable populations requiring protection.

- A. species abundance B. limestone pavement
C. knock-on effect D. single generation

Question 10: A sudden decrease in caterpillar survival rates serves as an urgent _____ for environmental conservationists.

- A. flexible lifecycle B. warning sign
C. single generation D. knock-on effect

Exercise 3: Complete the sentences

Question 11: Rising regional temperatures trigger an earlier spring _____ for various hibernating insect species.

- A. extent B. downfall C. emergence D. capacity

Question 12: Small insects with delicate, _____ wings are often particularly sensitive to unexpected changes in weather.

- A. coppiced B. dainty C. sought-after D. specialized

Question 13: Human habitat destruction has accelerated the gradual _____ of several specialized woodland organisms.

- A. emergence B. capacity C. downfall D. extent

Question 14: Under continued climate warming, certain northern species exhibit the _____ to expand their range further poleward.

- A. emergence B. downfall C. extent D. capacity

Question 15: Conservation organizations act swiftly to _____ further habitat loss by establishing protected biological reserves.

- A. emergence B. halt C. downfall D. extent

Exercise 4: Choose the best answer.

Question 16: The word **emergence** in the passage is closest in meaning to:

- A. disappearance B. destruction C. appearance D. movement

Question 17: The word **downfall** in the passage is closest in meaning to:

- A. growth B. decline C. arrival D. expansion

Question 18: The word **dainty** in the passage is closest in meaning to:

- A. delicate B. massive C. aggressive D. common

Question 19: The word **capacity** in the passage is closest in meaning to:

- A. limitation B. failure C. threat D. ability

Question 20: The word **halt** in the passage is closest in meaning to:

- A. start B. stop C. increase D. ignore

10	Prospecting ground	Vùng đất / Nơi thăm dò
11	Economic potential	Tiềm năng kinh tế
12	Marine ecosystem	Hệ sinh thái biển

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Commercial interest in _____ has surged due to growing global demand for metals used in electric vehicle batteries.

- A. deep-sea mining B. rare earth metal
C. sediment plume D. regulatory framework

Question 2: Medical researchers hope that unique microbes found in marine sponges can cure a deadly _____.

- A. regulatory framework B. antibiotic-resistant superbug
C. sediment plume D. prospecting ground

Question 3: Heavy mining machinery operating on the seabed generates a massive _____ that threatens filter-feeding organisms.

- A. regulatory framework B. prospecting ground
C. sediment plume D. rare earth metal

Question 4: Environmental lawyers argue that international waters currently lack an adequate _____ to manage industrial seabed extraction.

- A. deep-sea mining B. sediment plume
C. prospecting ground D. regulatory framework

Question 5: Scientists regard pristine marine habitats as a promising _____ for discovering novel pharmaceutical compounds.

- A. regulatory framework B. rare earth metal
C. sediment plume D. prospecting ground

Exercise 2: Choose the correct collocation.

Question 6: Unique ecosystems surrounding each active _____ support extremophile organisms capable of surviving extreme temperature changes.

- A. sediment plume B. hydrothermal vent
C. regulatory framework D. deep-sea mining

Question 7: High-tech devices like smartphones and wind turbines depend heavily on the extraction of scarce _____.

- A. sediment plumes B. regulatory frameworks
C. rare earth metals D. prospecting grounds

Question 8: Marine biologists urge world leaders to declare active volcanic seabed ecosystems strictly _____ to industrial exploitation.

- A. environmental impact B. regulatory framework
C. sediment plume D. off-limits

Question 9: Comprehensive research must be conducted to assess the long-term _____ of industrial dredging on benthic biodiversity.

- A. environmental impact B. rare earth metal
C. regulatory framework D. sediment plume

Question 10: Environmentalists advocate for sustainable exploration of the ocean's vast _____.

- A. sediment plume B. untapped potential
C. regulatory framework D. rare earth metal

Exercise 3: Complete the sentences

Question 11: Dredging machines scrape seabed mineral deposits, turning solid rock into a dense _____ for pumping to surface vessels.

- A. ramification B. assault C. slurry D. microbe

Question 12: Marine scientists warn that ocean seabed disturbance could trigger unexpected ecological _____ across deep ecosystems.

- A. assault B. ramification C. microbe D. slurry

Question 13: Heavy underwater machinery poses a destructive _____ on fragile deep-sea organisms that grow over centuries.

- A. microbe B. slurry C. assault D. ramification

Question 14: Overusing terrestrial mining sites will eventually _____ land-based mineral reserves, forcing industries to look elsewhere.

- A. excavate B. prospect C. discharge D. deplete

Question 15: Mining companies use converted industrial equipment to _____ rich ore deposits thousands of meters below the surface.

- A. deplete B. prospect C. excavate D. discharge

Exercise 4: Choose the best answer

Question 16: The word **breakthrough** in the passage is closest in meaning to:

- A. barrier B. failure C. advance D. delay

Question 17: The word **deplete** in the passage is closest in meaning to:

- A. expand B. build C. store D. exhaust

Question 18: The word **assault** in the passage is closest in meaning to:

- A. attack B. protection C. agreement D. assistance

Question 19: The word **ramification** in the passage is closest in meaning to:
