The Kākāpō

Topic: Conservation Biology • Rare Species • Wildlife Restoration

PART 1. VOCABULARY

STT	Vocabulary	POS	IPA	Meaning	Synonyms
1	nocturnal	adj	/nɒk'tɜːnl/	hoạt động về đêm	night-active, nighttime
2	flightless	adj	/'flaɪtləs/	không biết bay	earthbound, non-flying
3	solitary	adj	/'sɒlətri/	sống đơn độc	isolated, lone, single
4	forage	v	/'fɒrɪdʒ/	tìm kiếm thức ăn	search, scavenge, hunt
5	frond	n	/frɒnd/	lá cây dương xỉ / lá cọ	fern leaf, palm leaf
6	incubation	n	/.ɪŋkju'beɪʃn/	sự ấp trứng	brooding, hatching
7	prey	n/v	/preɪ/	con mồi / săn mồi	victim, target, quarry
8	coloniser	n	/'kɒlənaɪzə(r)/	người đi khai phá / thực dân	settler, pioneer
9	clearance	n	/'klɪərəns/	sự phát quang / đốn hạ rừng	deforestation, removal
10	deplete	v	/dɪ'pli:t/	làm kiệt quệ, tiêu hao	exhaust, drain, consume
11	stoat	n	/stəʊt/	con chồn ermine (động vật ăn thịt nhỏ)	ermine, small predator
12	initiative	n	/ɪ'nɪʃetɪv/	sáng kiến, phương án mới	plan, scheme, strategy
13	subsequent	adj	/'sʌbsɪkwənt/	xảy ra sau đó, tiếp theo	following, later, succeeding

14	feral	adj	/ˈferəl/	hoang dại (từ động vật nuôi bị xổng)	wild, untamed, untamed-domestic
15	sanctuary	n	/ˈsæŋktʃuəri/	khu bảo tồn, nơi trú ẩn an toàn	reserve, haven, shelter
16	offset	v	/ˌɒfˈset/	bù đắp, đền bù	counterbalance, compensate
17	mortality	n	/mɔːˈtæləti/	tỷ lệ tử vong, sự qua đời	death rate, fatalities
18	prompt	v	/prompt/	thúc đẩy, xúi giục, gây ra	trigger, provoke, cause
19	eradicate	v	/ɪˈrædɪkeɪt/	tiêu diệt tận gốc, xóa bỏ	eliminate, wipe out, exterminate
20	supplementary	adj	/ˌsʌplɪˈmentri/	bổ sung, phụ thêm	additional, extra, auxiliary
21	optimistic	adj	/ˌɒptɪˈmɪstɪk/	lạc quan	hopeful, positive
22	accommodate	v	/əˈkɒmədeɪt/	cung cấp chỗ ở / đáp ứng nhu cầu	house, shelter, contain
23	stakeholder	n	/ˈsteɪkhəʊldə(r)/	bên liên quan, các bên hợp tác	partner, participant, party
24	diversity	n	/daɪˈvɜːsəti/	sự đa dạng	variety, range, multiplicity
25	vulnerable	adj	/ˈvʌlnərəbl/	dễ bị tổn thương, nguy cấp	exposed, at-risk, helpless

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Critically endangered	Cực kỳ nguy cấp (trên đà tuyệt chủng)
2	Flightless parrot	Loài vẹt không biết bay
3	Habitat clearance	Sự phát quang / tàn phá môi trường sống
4	Introduced species	Các loài sinh vật ngoại lai
5	Island sanctuary	Khu bảo tồn trên đảo

6	Adult mortality	Tỷ lệ tử vong ở cá thể trưởng thành
7	Cautious optimism	Sự lạc quan thận trọng
8	Genetic diversity	Sự đa dạng di truyền
9	Predator-free island	Hòn đảo không có động vật ăn thịt
10	Supplementary feeding	Việc cung cấp thức ăn bổ sung
11	Feral cat	Mèo hoang (mèo nhà xổng ra ngoài tự nhiên)
12	Urgent review	Sự đánh giá / rà soát khẩn cấp

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: The kākāpō is officially classified as a _____ bird species due to severe historical population losses.

A. critically endangered B. introduced species C. adult mortality D. feral cat

Question 2: Environmentalists relocated remaining birds to an offshore _____ to isolate them from mainland predators.

A. adult mortality B. island sanctuary C. habitat clearance D. genetic diversity

Question 3: Uncontrolled land development and massive _____ severely reduced the native forest areas available to wildlife.

A. introduced species B. feral cat
C. habitat clearance D. cautious optimism

Question 4: Protecting a tiny surviving population poses challenges in maintaining adequate levels of _____.

A. critically endangered B. adult mortality C. feral cat D. genetic diversity

Question 5: Conservationists brought foreign mammals to the region, creating major problems as an invasive _____.

A. introduced species B. island sanctuary
C. cautious optimism D. habitat clearance

Exercise 2: Choose the correct collocation.

Question 6: Ecologists maintain a sense of _____ following recent increases in chick survival rates.

A. adult mortality B. introduced species
C. habitat clearance D. cautious optimism

Question 7: High rates of _____ made it nearly impossible for the small population to rebuild naturally.

A. adult mortality B. island sanctuary
C. genetic diversity D. habitat clearance

Question 8: Field workers provided essential _____ to ensure breeding females remained healthy during food shortages.

A. introduced species B. adult mortality
C. supplementary feeding D. habitat clearance

Question 9: Predation by the introduced _____ nearly wiped out the remaining kākāpō population on Rakiura Island.

- A. cautious optimism B. feral cat
C. island sanctuary D. genetic diversity

Question 10: Government authorities ordered an _____ of current wildlife preservation strategies after numbers dropped to 51.

- A. introduced species B. habitat clearance
C. adult mortality D. urgent review

Exercise 3: Complete the sentences.

Question 11: The kākāpō is a strictly _____ bird, venturing out into the forest almost exclusively after dark.

- A. flightless B. nocturnal C. solitary D. vulnerable

Question 12: To protect vulnerable chicks, conservation teams worked tirelessly to _____ all invasive rats from the island.

- A. accommodate B. deplete C. eradicate D. offset

Question 13: Introduced mammalian predators caused a drastic increase in chick _____ across the unmanaged nesting sites.

- A. mortality B. sanctuary C. initiative D. clearance

Question 14: The continuous loss of low-altitude forests threatens to _____ local food supplies for ground-dwelling birds.

- A. accommodate B. eradicate C. prompt D. deplete

Question 15: A new conservation _____ was launched in 1996 to secure additional funding and scientific support.

- A. mortality B. initiative C. clearance D. sanctuary

Exercise 4: Choose the best answer.

Question 16: The word **eradicate** is closest in meaning to:

- A. protect B. discover C. eliminate D. multiply

Question 17: The word **deplete** is closest in meaning to:

- A. expand B. exhaust C. preserve D. improve

Question 18: The word **vulnerable** is closest in meaning to:

- A. exposed B. safe C. aggressive D. strong

Question 19: The word **nocturnal** is closest in meaning to:

- A. daytime-active B. migratory C. noisy D. night-active

Question 20: The word **initiative** is closest in meaning to:

- A. failure B. plan C. obstacle D. delay

Topic: Environmental Conservation • Ecology & Biodiversity

PART 1. VOCABULARY

STT	Vocabulary	POS	IPA	Meaning	Synonyms
1	reintroduce	v	/,ri:ɪntrə'dju:s /	tái nhập, đưa trở lại tự nhiên	restore, bring back, replant
2	aftermath	n	/'ɑ:ftəmæθ/	hậu quả, giai đoạn sau thảm họa	consequence, aftermath, outcome
3	vascular	adj	/'væskjələ(r)/	thuộc về mạch (dẫn nước, dinh dưỡng)	circulatory, conductive
4	wilt	v	/wɪlt/	héo rũ	droop, wither, sag
5	epidemic	n	/,epɪ'demɪk/	dịch bệnh (trên diện rộng)	outbreak, plague, wave
6	virulent	adj	/'vɪrələnt/	rất độc, độc hại, lây lan mạnh	deadly, lethal, toxic
7	strain	n	/streɪn/	chủng (vi khuẩn, nấm, virus)	variety, type, subtype
8	hedgerow	n	/'hedʒrəʊ/	hàng rào cây xanh (quanh đồng ruộng)	fence, border, thicket
9	succumb	v	/sə'kʌm/	gục ngã, đầu hàng (trước bệnh tật)	yield, give in, perish
10	prominent	adj	/'prɒmɪnənt/	nổi bật, dễ thấy, quan trọng	noticeable, conspicuous, dominant
11	ingrained	adj	/,ɪn'greɪnd/	ăn sâu vào, gắn liền	deeply-rooted, fixed, embedded
12	advocate	n/v	/'ædvəkət/	người ủng hộ / công khai ủng hộ	champion, supporter, defender

13	precarious	adj	/prɪ'keəriəs/	bấp bênh, nguy hiểm, không ổn định	uncertain, risky, fragile
14	hybrid	n/adj	/'haɪbrɪd/	giống lai, sự kết hợp lai	crossbreed, mixture, composite
15	pathogen	n	/'pæθədʒən/	mầm bệnh, tác nhân gây bệnh	infectious agent, germ, virus
16	susceptible	adj	/sə'septəbl/	dễ bị ảnh hưởng, dễ nhiễm bệnh	vulnerable, sensitive, prone
17	acknowledge	v	/ək'nɒlɪdʒ/	thừa nhận, công nhận	admit, recognize, accept
18	wary	adj	/'weəri/	cảnh giác, thận trọng	cautious, suspicious, careful
19	analogue	n	/'ænələg/	vật / loài tương tự, bản sao	equivalent, parallel, counterpart
20	clone	v/n	/kləʊn/	nhân bản vô tính / bản sao	duplicate, copy, replicate
21	resistance	n	/rɪ'zɪstəns/	sự kháng cự, sức đề kháng	immunity, defense, tolerance
22	tolerance	n	/'tɒlərəns/	khả năng chịu đựng (bệnh/sốc)	endurance, resilience
23	keel	n	/ki:l/	sống thuyền (khung chính dưới đáy)	ship base, backbone
24	bark	n	/bɑ:k/	vỏ cây	tree skin, rind, crust
25	trigger	v	/'trɪɡə(r)/	kích hoạt, gây ra	spark, initiate, cause

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Dutch elm disease	Bệnh thui rụi cây xà cừ / bệnh xà cừ Hà Lan
2	Virulent strain	Chủng (mầm bệnh) cực kỳ độc tính
3	Vascular system	Hệ thống mạch dẫn (nước, chất dinh dưỡng)
4	Environmental case	Lập luận / lý do bảo vệ môi trường

5	Native species	Loài bản địa
6	Social acceptance	Sự chấp nhận của xã hội
7	High level of impact	Mức độ va đập / tác động cao
8	Mature survivor	Cây trưởng thành còn sống sót
9	Low hedgerow	Hàng rào cây thấp
10	Coastal city	Thành phố ven biển
11	Fungal pathogen	Mầm bệnh do nấm
12	Horticultural analogue	Loài cây trồng tương đương / bản sao cạnh tác

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Devastating outbreaks of _____ nearly wiped out the entire traditional elm tree population across Britain.

- A. Dutch elm disease B. vascular system
C. native species D. horticultural analogue

Question 2: The second wave of infection proved far more lethal because beetles carried a highly _____.

- A. native species B. virulent strain C. low hedgerow D. coastal city

Question 3: Environmentalists building an _____ argue that bringing back iconic trees restores critical woodland biodiversity.

- A. low hedgerow B. coastal city C. environmental case D. native species

Question 4: Critics warn against substituting an endangered _____ with artificially created crossbreeds.

- A. Dutch elm disease B. low hedgerow C. coastal city D. native species

Question 5: Introducing modified or non-native tree varieties into public countryside areas raises difficult questions regarding _____.

- A. social acceptance B. virulent strain
C. Dutch elm disease D. vascular system

Exercise 2: Choose the correct collocation.

Question 6: The parasitic fungus attacks and clogs the tree's _____, preventing necessary fluids from reaching upper branches.

- A. low hedgerow B. vascular system
C. environmental case D. native species

Question 7: Researchers focus their study on every rare _____ that mysteriously escaped infection during the nationwide epidemic.

- A. Dutch elm disease B. coastal city C. mature survivor D. low hedgerow

Question 8: Strong oceanic breezes help shield trees growing within a _____ by preventing beetles from landing easily.

A. low hedgerow B. native species C. environmental case D. coastal city

Question 9: Shipbuilders historically favored dense elm timber for constructing ship components subjected to a _____.

A. high level of impact B. Dutch elm disease
C. low hedgerow D. native species

Question 10: Scientists test young seedlings by injecting a microscopic sample of the targeted _____ under their bark.

A. low hedgerow B. fungal pathogen C. coastal city D. native species

Exercise 3: Complete the sentences.

Question 11: The fungal infection causes infected tree branches to rapidly _____ and drop their leaves within weeks.

A. clone B. wilt C. trigger D. acknowledge

Question 12: Botanists test new seedlings to determine if they are completely immune or highly _____ to the lethal pathogen.

A. ingrained B. susceptible C. prominent D. precarious

Question 13: The surviving coastal tree population remains in a _____ state, as beetles could easily invade from nearby inland regions.

A. prominent B. ingrained C. precarious D. susceptible

Question 14: Some conservationists remain highly _____ of human intervention, preferring to let natural selection generate immunity over time.

A. ingrained B. prominent C. susceptible D. wary

Question 15: Importing infected timber logs from abroad served to _____ the disastrous second wave of tree deaths in the 1970s.

A. wilt B. trigger C. succumb D. clone

Exercise 4: Choose the best answer.

Question 16: The word **virulent** in the passage is closest in meaning to:

A. harmless B. weak C. deadly D. slow

Question 17: The word **succumb** in the passage is closest in meaning to:

A. survive B. perish C. attack D. resist

Question 18: The word **precarious** in the passage is closest in meaning to:

A. stable B. safe C. permanent D. uncertain

Question 19: The word **susceptible** in the passage is closest in meaning to:

A. immune B. protected C. strong D. vulnerable

Question 20: The word **wary** in the passage is closest in meaning to:

A. reckless B. cautious C. eager D. confident

HOW STRESS AFFECTS OUR JUDGEMENT

Topic: Cognitive Neuroscience • Psychology of Stress • Information Processing

PART 1. VOCABULARY

STT	Vocabulary	POS	IPA	Meaning	Synonyms
1	hyper-vigilant	adj	/ˌhaɪpərˈvɪdʒɪlənt/	quá mức cảnh giác, đề phòng cao độ	overly watchful, highly alert
2	adverse	adj	/ˈædvɜːs/	bất lợi, tiêu cực, có hại	unfavorable, harmful, negative
3	fraud	n	/frɔːd/	sự lừa đảo, gian lận	deception, scam, cheating
4	cortisol	n	/ˈkɔːtɪsɒl/	hormone gây căng thẳng	stress hormone
5	spike	v/n	/spaɪk/	tăng vọt đột ngột	surge, rise sharply, jump
6	Neural	adj	/ˈnjuərəl/	thuộc thần kinh / não bộ	nervous, brain-related
7	famished	adj	/ˈfæmɪʃt/	đói cào ruột, nhịn đói lâu	starving, ravenous
8	exaggerate	v	/ɪɡˈzædʒəreɪt/	phóng đại, thổi phồng	overstate, inflate, magnify
9	collective	adj	/kəˈlektɪv/	tập thể, chung	combined, shared, joint
10	contagious	adj	/kənˈteɪdʒəs/	dễ lây lan (cảm xúc/bệnh)	infectious, spreading, catching
11	conscientious	adj	/ˌkɒnʃiˈenʃəs/	chu đáo, tận tâm, có trách nhiệm	diligent, careful, thorough
12	induce	v	/ɪnˈdjuːs/	xúi giục, kích thích, dẫn đến	prompt, provoke, cause
13	alter	v	/ˈɔːltə(r)/	thay đổi, biến đổi	change, modify, adjust

14	embrace	v	/ɪmˈbreɪs/	đón nhận, chấp nhận nồng nhiệt	accept, welcome, adopt
15	hazard	n	/ˈhæzəd/	mối nguy hiểm	danger, peril, threat
16	clinical	adj	/ˈklɪnɪkl/	thuộc lâm sàng (y học / tâm lý)	medical, diagnostic
17	uplifting	adj	/ˌʌpˈlɪftɪŋ/	truyền cảm hứng, làm phấn chấn	inspiring, cheerful, encouraging
18	pulse	n	/pʌls/	nhịp tim, mạch đập	heart rate, heartbeat
19	justify	v	/ˈdʒʌstɪfaɪ/	bào chữa, chứng minh là đúng	warrant, defend, validate
20	Hectic	adj	/ˈhektɪk/	cuồng nhiệt, bận rộn dồn dập	frantic, busy, chaotic
21	perceive	v	/pəˈsiːv/	nhận thức, cảm nhận	sense, detect, observe
22	incident	n	/ˈɪnsɪdənt/	sự cố, biến cố	event, occurrence, episode
23	frame	v	/freɪm/	dàn xếp, định hình (thông điệp)	structure, format, shape
24	optimistic	adj	/ˌɒptɪˈmɪstɪk/	lạc quan	hopeful, positive
25	absorb	v	/əbˈzɔːb/	hấp thụ, tiếp thu	take in, assimilate

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Adverse event	Bất lợi / Biến cố tiêu cực
2	Hyper-vigilant state	Trạng thái cảnh giác cao độ
3	Cortisol level	Nồng độ hormone stress (cortisol)
4	Neural signal	Tín hiệu thần kinh
5	Collective fear	Nỗi sợ hãi tập thể / đám đông
6	Stress reaction	Phản ứng căng thẳng
7	Warning sign	Dấu hiệu cảnh báo

8	Public speech	Bài phát biểu trước công chúng
9	Social media feed	Bảng tin mạng xã hội
10	Physiological reaction	Phản ứng sinh lý cơ thể
11	Famished predator	Động vật săn mồi đang đói khát
12	Agent of change	Nhân tố / Tác nhân tạo ra sự thay đổi

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: High-stress environments trigger a intense _____ that heightens a person's sensitivity to bad news.

A. stress reaction B. adverse event C. social media feed D. agent of change

Question 2: Participants forced to give an unexpected _____ exhibited a rapid increase in heart rate and stress hormones.

A. famished predator B. public speech C. collective fear D. warning sign

Question 3: Brain imaging scans demonstrate that processing a sudden _____ relies on specific pathways in the neural network.

A. public speech B. famished predator C. warning sign D. collective fear

Question 4: Evolutionary biology suggests that an automatic _____ helped early humans escape dangerous wild animals.

A. adverse event B. social media feed
C. agent of change D. physiological reaction

Question 5: Sensationalized news reporting after a natural disaster often fuels irrational, widespread _____.

A. collective fear B. public speech C. warning sign D. famished predator

Exercise 2: Choose the correct collocation.

Question 6: Under high pressure, firefighters enter a _____ where they process negative information far more effectively.

A. public speech B. hyper-vigilant state
C. social media feed D. famished predator

Question 7: Experimental subjects exposed to threatening scenarios experienced a sudden spike in their blood _____.

A. cortisol level B. public speech C. famished predator D. agent of change

Question 8: The brain uses a rapid _____ to alter how an individual evaluates potential environmental hazards.

A. social media feed B. public speech
C. neural signal D. famished predator

Question 9: Regularly scrolling through a negative _____ can inadvertently raise a person's pulse and anxiety levels.

A. public speech B. famished predator C. warning sign D. social media feed

Question 10: Empathetic leaders who understand psychological stress can frame messages effectively to become an active _____.

A. public speech B. agent of change C. famished predator D. warning sign

Exercise 3: Complete the sentences.

Question 11: Highly anxious individuals often become extremely _____ to potential threats, ignoring encouraging signs.

A. clinical B. hyper-vigilant C. hectic D. famished

Question 12: Repeatedly checking news alerts on a smartphone can significantly _____ blood pressure and heart rate.

A. spike B. frame C. embrace D. induce

Question 13: Misleading posts on social media networks tend to _____ real-world dangers, causing unnecessary public distress.

A. embrace B. frame C. exaggerate D. spike

Question 14: Positive emotions like optimism and hope are highly _____, helping communities unite during crisis recovery.

A. clinical B. hectic C. famished D. contagious

Question 15: Understanding the relationship between emotion and cognition allows scientists to _____ educational health campaigns better.

A. spike B. frame C. embrace D. exaggerate

Exercise 4: Choose the best answer.

Question 16: The word **exaggerate** in the passage is closest in meaning to:

A. minimize B. ignore C. overstate D. clarify

Question 17: The word **contagious** in the passage is closest in meaning to:

A. isolated B. infectious C. dangerous D. rare

Question 18: The word **hyper-vigilant** in the passage is closest in meaning to:

A. overly watchful B. careless C. exhausted D. indifferent

Question 19: The word **spike** in the passage is closest in meaning to:

A. plummet B. stabilize C. disappear D. rise sharply

Question 20: The word **induce** in the passage is closest in meaning to:

A. prevent B. prompt C. delay D. suppress

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Aquatic mammal	Động vật có vú sống dưới nước
2	Pectoral flipper	Chân chèo ngực
3	Abrasive diet	Chế độ ăn nhiều chất mài mòn (thực vật thô)
4	Ambient water temperature	Nhiệt độ nước môi trường xung quanh
5	Warm-water outfall	Cửa xả nước ấm (từ nhà máy điện)
6	Heightened risk of extinction	Nguy cơ tuyệt chủng gia tăng cao
7	Incidental capture	Sự bắt giữ tình cờ / mắc lưới ngẫu nhiên

8	Landlocked country	Quốc gia không giáp biển
9	Boat strike	Sự va chạm với tàu thuyền
10	Muscular diaphragm	Cơ hoành săn chắc / phát triển
11	Fishing net	Lưới đánh cá
12	Take refuge	Trú ẩn / Tìm nơi nương tựa

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: The West Indian manatee is a large _____ that inhabits coastal regions and inland rivers.

A. aquatic mammal B. boat strike C. warm-water outfall D. fishing net

Question 2: During cold winter months, Florida manatees often _____ in artificially heated canal zones.

A. take refuge B. incidental capture C. abrasive diet D. landlocked country

Question 3: Power generation plants release heated thermal effluents through a prominent _____.

A. boat strike B. warm-water outfall C. fishing net D. landlocked country

Question 4: African manatees can be found traveling far up inland river systems into a completely _____.

A. abrasive diet B. boat strike C. warm-water outfall D. landlocked country

Question 5: Speed limits are strictly enforced on motorboats to reduce the frequency of fatal _____.

A. boat strikes B. aquatic mammals C. fishing nets D. warm-water outfalls

Exercise 2: Choose the correct collocation.

Question 6: Grinding coarse aquatic vegetation every day exposes the animal's teeth to an exceptionally _____.

A. aquatic mammal B. abrasive diet C. fishing net D. warm-water outfall

Question 7: Manatees navigate through shallow coastal waters using their flexible _____ for steering.

A. warm-water outfall B. pectoral flippers
C. boat strike D. landlocked country

Question 8: Commercial fisheries contribute to population declines when animals suffer _____ in lost gear.

A. warm-water outfall B. boat strike
C. incidental capture D. landlocked country

Question 9: Habitat loss and human activities place all three surviving manatee species at a _____.

A. warm-water outfall B. boat strike
C. landlocked country D. heightened risk of extinction

Question 10: The animal regulates its floating position under water by contracting its powerful _____.

- A. warm-water outfall B. muscular diaphragm
C. boat strike D. landlocked country

Exercise 3: Complete the sentences

Question 11: Heavy underwater plant material forces manatees to constantly grow new molars as old ones are worn down by _____ foods.

- A. abrasive B. incidental C. landlocked D. restricted

Question 12: To adjust its internal _____ while resting, the creature compresses stored gases within its digestive tract.

- A. outfall B. incisor C. buoyancy D. vibration

Question 13: Unlike its Amazonian and West Indian relatives, the African species is partially _____ and consumes small fish.

- A. restricted B. omnivorous C. incidental D. landlocked

Question 14: Accidental _____ in abandoned commercial fishing nets accounts for hundreds of marine mammal injuries each decade.

Question 4: Carbon emissions dissolving in seawater accelerate _____, which weakens the calcium carbonate structures of reefs.

- A. thermal stress B. artificial reef
C. symbiotic relationship D. ocean acidification

Question 5: Preserving marine biodiversity across global oceans has become a critically urgent _____ for modern conservationists.

- A. ecological goal B. artificial reef C. symbiotic relationship D. thermal stress

Exercise 2: Choose the correct collocation.

Question 6: Prolonged heatwaves in marine environments trigger widespread _____ that strip colorful corals of their nutrients.

- A. artificial reef B. bleaching event
C. symbiotic relationship D. ecological goal

Question 7: Researchers are attempting to identify _____ that demonstrate higher tolerance to acidic and warm sea waters.

- A. artificial reef B. thermal stress C. hardy species D. ecological goal

Question 8: Controlled laboratory environments have successfully induced artificial _____, increasing reproduction frequency per year.

- A. artificial reef B. thermal stress C. ecological goal D. coral spawning

Question 9: Global warming presents an _____ that threatens to destroy fragile marine habitats within decades.

- A. immediate problem B. artificial reef

C. symbiotic relationship D. ecological goal

Question 10: Modern breeding programs aim to reintroduce healthy lab-grown organisms back to degraded, _____.

A. artificial reef B. blighted reefs
C. symbiotic relationship D. ecological goal

Exercise 3: Complete the sentences

Question 11: Rising ocean temperatures and pollution represent major _____ threatening the survival of marine ecosystems.

A. tentacles B. menaces C. emissions D. ecosystems

Question 12: Laboratory researchers aim to _____ specific coral varieties capable of enduring extreme heat and low pH levels.

A. photosynthesise B. exhibit C. spawn D. pinpoint

Question 13: Tiny micro-algae living inside coral polyps _____ sunlight to produce energy and essential nutrients.

A. spawn B. pinpoint C. photosynthesise D. eliminate

Question 14: Coral polyps use flexible, sting-capable _____ to capture small floating organic particles from surrounding currents.

A. menaces B. ecosystems C. emissions D. tentacles

Question 15: Thousands of small, backbone-less _____ form the structural base of vibrant underwater coral communities.

A. tentacles B. menaces C. invertebrates D. ecosystems

Exercise 4: Choose the best answer.

Question 16: The word **menace** in the passage is closest in meaning to:

A. help B. view C. threat D. solution

Question 17: The word **hardy** in the passage is closest in meaning to:

A. fragile B. resilient C. colorful D. small

Question 18: The word **pinpoint** in the passage is closest in meaning to:

A. hide B. ignore C. change D. identify

Question 19: The word **blighted** in the passage is closest in meaning to:

A. pristine B. damaged C. glowing D. deep

Question 20: The word **crucial** in the passage is closest in meaning to:

A. optional B. essential C. minor D. recent

PART 2. COLLOCATIONS

STT	Collocation	Meaning
1	Morally dubious	Đáng ngờ về mặt đạo đức
2	Autonomous threat	Mối đe dọa mang tính tự chủ
3	Human supremacy	Sự thống trị của con người
4	First-rate science fiction	Truyện viễn tưởng hạng nhất / xuất sắc
5	Dystopian society	Xã hội viễn tưởng bi quan / suy tàn
6	Technological singularity	Điểm kỳ dị công nghệ (AI vượt con người)
7	Outstrip human intelligence	Vượt xa trí thông minh con người

8	Human welfare	Phúc lợi / Sự an nguy của con người
9	Inanimate object	Vật thể vô sinh / Đồ vật không có sự sống
10	Creative intelligence	Trí thông minh sáng tạo
11	Malicious designer	Nhà thiết kế có ý đồ xấu / Độc hại
12	Pressing need	Nhu cầu cấp bách

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Exploiting space minerals purely for economic gain without moral guidelines seems completely _____.

- A. dystopian society B. morally dubious
C. human supremacy D. pressing need

Question 2: Futuristic literature often depicts a bleak, _____ where autonomous machines suppress human freedom.

- A. pressing need B. dystopian society
C. human supremacy D. morally dubious

Question 3: Prominent computer scientists debate whether advanced neural networks will ever truly _____.

- A. pressing need B. morally dubious
C. outstrip human intelligence D. dystopian society

Question 4: Society faces no _____ to colonize distant celestial bodies while terrestrial oceans remain largely unexplored.

- A. morally dubious B. dystopian society
C. human supremacy D. pressing need

Question 5: Critics worry that advanced artificial agents operating without ethical boundaries might pose a serious _____.

- A. autonomous threat B. morally dubious
C. dystopian society D. pressing need

Exercise 2: Choose the correct collocation.

Question 6: People tend to project personal human characteristics onto an _____ like a robotic household vacuum.

- A. morally dubious B. inanimate object C. dystopian society D. pressing need

Question 7: Developing software capable of original artistic composition requires a level of _____ that current AI lacks.

- A. morally dubious B. creative intelligence
C. dystopian society D. pressing need

Question 8: Cyber attacks are rarely the fault of the system itself, but rather the work of a _____.

- A. malicious designer B. morally dubious
C. dystopian society D. pressing need

Question 9: Reading _____ can spark imaginative problem-solving skills better than reading outdated technical papers.

- A. morally dubious B. first-rate science fiction
C. dystopian society D. pressing need

Question 10: Anthropologists note that automated tools have never actually challenged established _____.

- A. morally dubious B. pressing need
C. dystopian society D. human supremacy

Exercise 3: Complete the sentences

Question 11: Future generations of automated probes will navigate uncharted space environments far more _____ than early models.

- A. malicious B. dubious C. adeptly D. dystopian

Question 12: Modern societies tend to _____ non-living devices, assigning human emotions and motives to artificial systems.

- A. fret B. collide C. personify D. carve

Question 13: Theoretical physicists predict that reaching the technological _____ will permanently change human civilization.

- A. successor B. singularity C. divide D. perspective

Question 14: Over-reliance on interconnected global networks might lead to scenarios where automated systems _____ human controllers.

- A. fret B. personify C. outwit D. collide

Question 15: Technological developers emphasize that the overarching societal benefits of AI will ultimately _____ its temporary disruptions.

- A. fret B. outweigh C. collide D. carve

Exercise 4: Choose the best answer.

Question 16: The word **dubious** in the passage is closest in meaning to:

- A. clear B. certain C. doubtful D. beneficial

Question 17: The word **outstrip** in the passage is closest in meaning to:

- A. follow B. restrict C. imitate D. surpass

Question 18: The word **personify** in the passage is closest in meaning to:

- A. humanize B. destroy C. ignore D. fear

Question 19: The word **outwit** in the passage is closest in meaning to:

- A. obey B. teach C. assist D. outsmart

Question 20: The word **envisage** in the passage is closest in meaning to:

- A. reject B. imagine C. conceal D. destroy

2	Botanical subject	Chủ đề thực vật / hoa cỏ

3	Sun-bleached bone	Xương khô phơi nắng
4	Geological formation	Cấu tạo địa chất
5	Geometric shape	Hình khối hình học
6	Aerial view	Góc nhìn từ trên cao / nhìn từ máy bay
7	Monumental canvas	Bức tranh khổ lớn / quy mô vĩ đại
8	Rich legacy	Di sản phong phú
9	Subtle nuance	Sắc thái tinh tế
10	Relative solitude	Sự ẩn dật / tĩnh lặng tương đối
11	Soaring skyscraper	Tòa nhà chọc trời cao vút
12	Rugged terrain	Địa hình hiểm trở / gồ ghề

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Early modernists frequently exhibited their works alongside other _____ figures in New York galleries.

- A. avant-garde artists B. soaring skyscrapers
C. geological formations D. rich legacies

Question 2: The artist spent months painting in the desert, capturing details of every _____ scattered across the sand.

- A. soaring skyscraper B. sun-bleached bone
C. avant-garde artist D. geological formation

Question 3: Breathtaking pictures of the desert landscape featured dramatic, unusual _____ carved by wind and water.

- A. avant-garde artists B. soaring skyscrapers
C. geological formations D. rich legacies

Question 4: Flying above the clouds inspired a major series of works depicting vast _____ of river systems below.

- A. soaring skyscrapers B. avant-garde artists C. rich legacies D. aerial views

Question 5: Generations of art lovers continue to derive deep inspiration from the painter's remarkably _____.

- A. soaring skyscraper B. avant-garde artist
C. rich legacy D. geological formation

Exercise 2: Choose the correct collocation.

Question 6: Masterful brushwork allows painters to capture every _____ of natural light and shade on canvas.

- A. avant-garde artist B. subtle nuance
C. soaring skyscraper D. geological formation

Question 7: During the 1920s, architectural paintings dramatically depicted the city's _____ touching the clouds.

- A. avant-garde artists B. soaring skyscrapers

Question 8: The painter preferred working in _____ in New Mexico rather than enduring the noisy city environment.

C. soaring skyscraper D. relative solitude

C. geological formation D. avant-garde artist

C. geological formation D. avant-garde artist

Question 11: Magnifying small natural shapes to fill a massive canvas helps turn realistic subjects into _____ forms.

Question 12: The desert landscape offered a dramatic contrast between smooth _____ surfaces and sharp, jagged edges.

Question 13: Completing a six-meter painting at nearly eighty years of age represented an extraordinary artistic _____.

Question 14: In her later years, failing eyesight began to severely _____ her capacity to produce new artworks.

Question 15: The courtyard's striking black door was repeatedly reinvented as an arrangement of simple _____ shapes.

Exercise 4: Choose the best answer.

A. roughness B. speed C. skill D. force

A. encourage B. obstruct C. accelerate D. assist

A. failure B. mistake C. attempt D. achievement

A. smooth B. rough C. flat D. soft

A. narrow B. limited C. vast D. tiny

STT	Collocation	Meaning
1	Climate-mitigation strategy	Chiến lược giảm thiểu tác động biến đổi khí hậu
2	Stormwater management	Quản lý nước mưa / chống ngập úng
3	Multifunctional approach	Phương pháp tiếp cận đa chức năng
4	Amphibious house	Nhà lưỡng cư (vừa ở trên cạn vừa nổi trên nước)
5	Salt-tolerant crop	Cây trồng chịu mặn
6	Saline agriculture	Nông nghiệp vùng đất mặn

7	Cool pavement	Mặt đường tản nhiệt / chống hấp thụ nhiệt
8	Coastal erosion	Sự xói mòn bờ biển
9	Semi-permeable dam	Đập bán thấm
10	Tree canopy cover	Mật độ che phủ của tán cây
11	Thermal image	Hình ảnh chụp quét nhiệt
12	Natural process	Quá trình tự nhiên

PART 3. EXERCISES

Exercise 1: Mark the letter A, B, C, or D to indicate the correct answer.

Question 1: Municipal planners implemented an ambitious _____ system to protect low-lying streets from severe seasonal flooding.

- A. stormwater management B. salt-tolerant crop
C. coastal erosion D. tree canopy cover

Question 2: Engineering teams designed a budget-friendly _____ that rises safely along with floodwaters during severe monsoon storms.

- A. tree canopy cover B. amphibious house
C. coastal erosion D. salt-tolerant crop

Question 3: Agricultural research institutes encourage farmers in coastal areas to plant a highly _____ to sustain food production.

- A. coastal erosion B. tree canopy cover
C. salt-tolerant crop D. stormwater management

Question 4: Severe destruction of coastal vegetation usually accelerates the rate of harmful _____.

- A. stormwater management B. tree canopy cover
C. salt-tolerant crop D. coastal erosion

Question 5: Applying special light-reflecting coatings on roads creates a effective _____ capable of significantly lowering surface temperatures.

- A. salt-tolerant crop B. stormwater management
C. cool pavement D. coastal erosion

Exercise 2: Choose the correct collocation.

Question 6: Successful conservation projects favor a _____ that embeds natural ecological processes into community planning.

- A. coastal erosion B. multifunctional approach
C. salt-tolerant crop D. tree canopy cover

Question 7: Satellite instruments easily identify heat islands across dense urban centers by analyzing a detailed _____.

- A. coastal erosion B. salt-tolerant crop C. thermal image D. tree canopy cover

Question 8: Restoring native mangrove forests allows coastal environments to rely on a proven _____ for wave energy reduction.

- A. coastal erosion B. natural process C. salt-tolerant crop D. tree canopy cover

Question 9: Building a temporary _____ out of local bamboo helps trap rich sediment to encourage natural plant regrowth.

- A. coastal erosion B. semi-permeable dam
C. salt-tolerant crop D. tree canopy cover

Question 10: Urban heat abatement programs prioritize planting native trees in neighborhoods lacking sufficient _____.

- A. coastal erosion B. stormwater management
C. salt-tolerant crop D. tree canopy cover

Exercise 3: Complete the sentences

Question 11: Constructing heavy concrete sea walls on soft soil often serves to _____ coastal erosion rather than prevent it.

- A. retrofit B. exacerbate C. cultivate D. dampen

Question 12: Water began to _____ up through porous underground rock, making traditional ground barriers completely ineffective.

- A. seep B. retrofit C. cultivate D. thrive

Question 13: Raising road heights and installing high-capacity pumps contributed to the gradual _____ of low-elevation neighborhoods.

- A. subsidence B. elevation C. salinity D. canopy

Question 14: Instead of building expensive new foundations, engineers prefer to _____ existing structures with buoyant devices.

- A. cultivate B. exacerbate C. retrofit D. seep

Question 15: Soil with excessively high levels of _____ prevents traditional crops like rice and wheat from growing efficiently.

- A. salinity B. elevation C. canopy D. subsidence

Exercise 4: Choose the best answer

Question 16: The word **exacerbate** in the passage is closest in meaning to:

- A. improve B. prevent C. aggravate D. ignore

Question 17: The word **barren** in the passage is closest in meaning to:

- A. fertile B. infertile C. green D. wet

Question 18: The word **thrive** in the passage is closest in meaning to:

- A. decay B. struggle C. stop D. flourish

Question 19: The word **retrofit** in the passage is closest in meaning to:

- A. destroy B. modify C. abandon D. sell

Question 20: The word **dampen** in the passage is closest in meaning to:

- A. increase B. ignite C. reduce D. measure
